

TWO ROXBURY BOYS
THIS YEAR WIN THE
SCHOLARSHIP TOUR

Peter F. Doyle and Paul R. Williams Take High Rank and Are Awarded Valued Trip to Central America.

PANAMA INCLUDED

Youths Will Visit Several Important Countries and Report to Merchants Who Provide the Fund.

Two Roxbury boys this year secure the much-coveted "traveling scholarships" of the Boston High School of Commerce. The tours have been won by Peter F. Doyle and Paul Raymond Williams, both residents of that section of the city.

In a competitive examination in such subjects as modern languages, economics and knowledge of commercial conditions in South America, for members of the senior class, they received the highest ranks.

Starting July 8, they will take a tropical trip over the steamship lines of the United Fruit Company, visiting Central America, Jamaica and Costa Rica, and returning Sept. 27. They will then make an official report to the business men's committee, covering the result of their investigations there. This is the itinerary.

Leave New York by the steamship Jose July 8; arrive Belize, British Honduras, a. m.; leave Belize p. m., July 5, arrive Puerto Barrios, Guatemala, July 16; 13 days in Guatemala, visiting banana plantations, Guatemala City and other places of interest; leave Puerto Barrios July 29; arrive at Puerto Cortez, Spanish Honduras, same day, and leave Puerto Cortez July 29—giving one day at that port; arrive and leave Belize, British Honduras, a. m., July 30; arrive New Orleans, La., Aug. 2; leave New Orleans Aug. 7; arrive Colon, Panama, Aug. 12 (five days on isthmus, giving time for rail trip to Panama City and visiting Panama canal); leave Colon Aug. 17; arrive Port Limon, Costa Rica, Aug. 18 (11 days at Costa Rica—at Port Limon, on the plantations, the railway line and at San Jose, the capital of the republic); leave Port Limon for Boston (direct) Aug. 29; arrive Boston Sept. 7; leave Boston for Port Antonio, Jamaica, Sept. 8; arrive Port Antonio Sept. 14; leave Jamaica for Boston Sept. 21; arrive Boston Sept. 27.

Last year a similar trip was taken by two young students, who brought back valuable information as the result of a trip that was mutually beneficial to them and the founders of the fund.

NEWPORT TO GET
BETTER SERVICE

PROVIDENCE, R. I.—Shorter time between Providence and Fall River and close connections at Fall River with Newport trains will be provided tomorrow by the new timetable of the Warren and Bristol branch. There also will be a new train from Fall River to Providence which will eliminate a long delay at Fall River complained of by Newport passengers who leave Newport at 8:10 a. m. for Providence.

The 8:10 from Newport will connect with the new train, arriving in Providence at 9:35 o'clock from Fall River. Fall River trains will be run half-hourly, Warren trains every 15 minutes and Bristol trains hourly, except mornings and evenings and Sundays.

VOTE ON NEW CHARTER BILL
SCHEDULED IN HOUSE TODAY

Many Amendments Moved in the Course of Debate by Members of Both Political Parties and Referendum Clauses Especially Are Urged.

The House of Representatives today resumed its debate on the Boston charter bill, and on motion of Mr. Mildram of Boston the time for debate was extended until 3 o'clock this afternoon, with the understanding that a vote shall be taken on all amendments and on the bill itself before adjournment tonight.

Mr. Malley of Boston offered an amendment to provide for the direct nomination of candidates for mayor and councilmen. He said he did not favor a general referendum on the bill, but he feared for the future of the Republican party if such a referendum as is included in the bill is sent to the people.

Mr. Nichols of Boston favored the bill and opposed all amendments.

Mr. Fay of Boston offered several amendments to the bill. He urged that the council should consist of two members from every ward and one additional member each from Wards 20 and 24.

SENATE DEMOCRAT
IN ROUSING SPEECH
URGES PROTECTION

Mr. McEnery of Louisiana Makes Plea for Straight Duty, Deprecating "For Revenue Only" Doctrine.

CITES SUGAR TARIFF

WASHINGTON—Straight protection doctrine, proclaimed by a Democratic member was a diversion in the Senate today. Mr. McEnery of Louisiana, speaking for protective duties on lumber and sugar, and of the benefits derived by his state from these industries, said:

"In the face of this showing, made possible through protection, it is time that the Democrats abandoned their absurd theory of a tariff for revenue only and supported the interests of the United States. I would not put a tariff on sugar for revenue only, but because of the necessity that this country become independent of foreign production."

"With protection," the senator declared, "the sugar industry in this country would, before long, be supplying the world."

"Why sacrifice the people to the original sin of the so-called sugar trust? The manufacturers have a right to buy sugar and refine it provided they do not enter into a conspiracy in restraint of trade."

He declared that the other farmers of the country had been given assistance by the government in protecting their crops from pests, while the cane planter had received none.

ENTRANCE TESTS
FOR CITY SCHOOLS

It is announced by Thornton D. Appolonio, secretary of the Boston school committee that examinations for admission to the normal, Latin and high schools will be held as follows: Normal school, on Thursday and Friday, June 10 and 11 at the normal schoolhouse, Huntington avenue; Latin schools, on Friday, June 11, the boys to be examined at the Latin school on Warren avenue and the girls at the girls' Latin school in the Fenway; high schools on Thursday and Friday, June 10 and 11, at the several high schoolhouses. The subjects of examination will be English language, reading, government of the United States, geography and arithmetic.

WAR FLAG GREET
ROOSEVELT TODAY

NAIROBI, British East Africa—Ex-President Theodore Roosevelt and his party arrived here at 4 o'clock this afternoon from the Heatley ranch. Major Mearns and Professor Loring rejoined the party here, with more than 400 specimens of mammals, birds and snakes, which will be sent to the Smithsonian Institution at Washington.

The Spanish-American war was vividly recalled to Colonel Roosevelt by the display of a flag captured by an American at the naval battle of Santiago. The owner has since settled in British East Africa, and has added his prized relic to the wealth of decorations that have been put out for today in the town in honor of Mr. Roosevelt's return.

FOXWELL CASE CONTINUED.

Charles L. Foxwell of Washington, D. C., was before Judge Wentworth in the police court today charged with the larceny of \$2000 from the Growler Copper Company of Boston. Attorney Sughrue, who appeared for the government, secured a continuance of the case until June 9.

Shoe and Leather Fair "Open House" Today

INTERIOR VIEW OF NEW SHOE AND LEATHER FAIR BUILDING, CAMBRIDGE.

From the point where this picture was taken to the opposite end is 460 feet. The huge exhibition hall stands in a prominent place on the Charles river esplanade.

SEVERAL hundred representative shoe and leather men are inspecting this afternoon the new exhibition building on the Charles river esplanade, Cambridge, which is to house the first shoe and leather fair in this country. The visit today is preliminary to the influx of the large number of manufacturers, wholesalers, retailers and traveling salesmen expected from all parts of this continent and Europe when the exposition opens formally on July 1.

The visitors from this city journeyed out in automobiles and street cars, and on approaching the building were impressed with its admirable location and the important factor it would become in the scheme for the beautification of the Charles river's banks.

The New England Shoe and Leather Association was officially represented by President John C. Hoyt, Treasurer George McConnell and Secretary Anderson. Al-

though this informal housewarming was originally intended for only leather and newspaper men, large numbers of Cambridge people could not resist the temptation to make an inside inspection of the first exposition building in their city. Since the foundations for the building were being laid Cambridge has been congratulating itself upon the distinct asset it had gained.

The construction of this building by trade interests was coincident with the campaign for a declaration for free hides by Congress in the pending tariff bill. Although the results of this vigorous and concerted movement are not yet assured, it has had the unqualified support of every branch of the trade in the New England states.

The same interests who are now propagating the cause of free hides in Washington are interested in the construction of this building, and this alone is a fac-

tor of no little importance in maintaining New England's prestige as a shoe and leather center.

One of the unusual sights at this preliminary opening is that of automobiles being driven direct from the roadway into the main auditorium of the exposition building. This is a distinctive novelty in big expositions. When the fair is opened to the general public on July 1 the public will have similar privilege.

The interior of the immense auditorium is being rapidly put in shape for the formal opening on July 1. Decorators and electrical engineers are transforming the place into a spectacle of great beauty. In the grand central dome alone are 3000 electric lights. Powerful incandescent lamps are being installed all over the structure to give it complete illumination.

Among the more prominent shoe and leather centers.

RAILWAY POSTAL
CLERKS TO MEET

New England Delegates Will Make Final Arrangements Tomorrow for Trip to Atlanta for Next Convention.

Preparations are being made by the New England delegates to the seventeenth annual convention of the National Railway Mail Clerks Association, which will convene at Atlanta, Ga., on Tuesday next. The New England delegates will meet in the federal building, Boston, tomorrow afternoon to discuss, arrange and make final arrangements. They will arrive at Atlanta on Monday. Among the delegates will be Alah C. Walton of Jamaica Plain, president of the first division of the association; Thomas W. Dickson of Bangor, Me.; Fineon Keith of Norwalk, Conn.; John J. Cushing of Somerville, Mass., and George W. Wood of Portsmouth, who is secretary of the national association, and who intends to seek reelection.

One of the chief measures of the convention will be a petition to the postmaster-general, who in turn will present it to Congress, in which the petitioners ask that the railway mail clerks be granted "per diem" expenses for lodgings and food while away from home on official business for the postal authorities.

CRUISER IS GOING
TO HUDSON RIVER

The rebuilt United States first-class cruiser New York will leave the Charleston navy yard tomorrow for New York, where she will fire the national salute of 21 minute guns on the Hudson river Memorial day. On June 6 the cruiser will be passed upon by the board of naval inspectors at a berth in the North river.

Commander Spencer S. Wood is in command of the cruiser, and has supervised the work of reconstructing her. He is ordered to return to the Boston navy yard June 10 to receive a number of midshipmen from the graduating class of the naval academy on board. After the young officers have reported the New York will sail for the Mediterranean to join the armored cruisers Montana and North Carolina, and the three ships will drill as a unit on the voyage back from Asiatic Turkey.

"WASHTUB" WILL
IS DISALLOWED

The famous "washtub" will, which purported to dispose of the \$200,000 estate left by Patrick Monahan of Charlestown, was disallowed in the probate court today by Judge Grant. Attorneys for the will failed to produce any witnesses to the testament, hence the decision.

The property will now go to John Monahan, 1295 Congress street, Chicago, a brother; Elizabeth McGowan and Mary McGowan, both of Buckode, Leintrim, Ireland, Anne McGuinness of Manor Hamilton, Ireland, and Bridget Tosney, 25 White street, East Boston, sisters of the decedent.

MALDEN TO BEGIN
MONUMENT WORK

Malden of Massachusetts Will Lay the Sailors and Soldiers' Memorial Cornerstone Next Monday.

MALDEN—The corner stone of the new \$20,000 soldiers and sailors' monument in Malden will be laid at Bell Rock Park at 2:30 o'clock next Monday afternoon.

The exercises will be held under the direction of the Grand Lodge of Masons of Massachusetts.

The monument, designed by Bela L. Pratt, will be constructed of bronze, and will be mounted on a granite pedestal. It will be 30 feet high.

The exercises will open with an original ode, entitled "For the Soldiers," by a chorus of high school students, under the direction of Melville E. Chase, supervisor of music in the Malden schools. The ode was composed by Miss Helen Chadwick of Malden.

The ode will be followed by an invocation by the Rev. H. H. French. Ex-Mayor Charles D. McCarthy will deliver a historical address. Mayor George L. Richards will present Grand Master Dana J. Flanders, who will then on be in charge of the ceremonies.

Readings from the Scriptures will be given by the Rev. Edward A. Horton, grand chaplain of the Masons. The contents of the box to be placed in the corner stone will be read by Right Worshipful C. H. Ramsey and the laying and cementing of the stone will ensue, Grand Master Flanders officiating.

C. F. BELDEN APPOINTED TODAY
LIBRARIAN OF MASSACHUSETTS

Governor's Council Selects Cambridge Man to Succeed Caleb B. Tillinghast—T. B. Fitzpatrick of Brookline Named for Massachusetts Board of Education.

Charles F. D. Belden of Cambridge was appointed state librarian in the place of Caleb B. Tillinghast at a meeting of the Governor's council today.

There were many candidates for the place, including librarians of the various municipal libraries of the commonwealth, but their candidacies were kept quiet. None of those who were publicly mentioned as candidates would have accepted the place if tendered. His excellency had a strong list of about 25 to draw from when he finally determined to make the appointment.

The new librarian was born at Syracuse, N. Y., and is now a resident of Cambridge. He attended the public schools at Niagara Falls and the central high school at Buffalo, N. Y., from which he graduated with honors and was president of the '91 class. He entered Harvard College as a special student of the class of '95 and received the degree of LL. D. in 1898. He returned to New

York city in January, 1899, and was admitted to the bar. In March of the same year he returned to Cambridge and became secretary to the faculty of law, which position he held until appointed as district librarian of the Harvard law school of 1902. He resigned his position at the law school and became librarian of the Social Law Library of Boston on Sept. 1, 1908, which position he holds at present.

Thomas B. Fitzpatrick of Brookline was appointed a member of the state board of education. Hiram F. Mills of Lowell was appointed a member of the state board of health. Henry P. Kennedy of Boston was appointed clerk of the Brighton municipal court of the city of Boston.

LONDON CONSUL-GENERAL QUILTS.

WASHINGTON—Robert J. Wynne, consul-general at London, has resigned, and will be succeeded by J. L. Griffiths, who is now consul at Liverpool.

BOSTON AFFECTED
BY MOVE AGAINST
EXPRESS COMBINE

Minnesota State Senator Asks Commerce Board to Take Action in Case of Alleged Business Monopoly.

DISCLOSED BY SUIT

Shipping interests and mercantile leaders of Boston today are watching closely the effect of the general attack on the system and management of the principal express companies doing business throughout the country and started by State Senator B. E. Sundberg of Minnesota. Local business men see in the move a possible escape from what are sometimes considered burdensome charges, while any action on the matter would probably effect a readjustment of Boston shipping arrangements.

Senator Sundberg has lodged a complaint with the interstate commerce commission at Washington, in which he declares the American, the Adams and the United States Express companies have formed themselves into an illegal monopoly for the control of the express business throughout the United States, and that they are conducting such monopoly in violation of the Sherman anti-trust act of 1887.

The senator asks the commission to break up the monopoly and to fix a schedule of prices for the express business which will bear a fair relation to the cost of transportation.

That such a proceeding had been begun became known when it was announced in the supreme court by L. H. Newkirk, as counsel for John H. Dudley, a shareholder in the United States Express Company, that Mr. Dudley wished to withdraw temporarily his motion for the appointment of a temporary receiver for the company, pending the trial of his suit for a permanent receivership and the dissolution of the corporation.

Lawyer Newkirk said he had learned some additional facts. Among the new facts is the complaint of Senator Sundberg. Additional facts relate to the personal management of the United States Express Company by the Platt family.

NORTH OUT TODAY
AS CENSUS HEAD

WASHINGTON—Director S. N. D. North has resigned from the census office. The official announcement of his leave-taking was made public at the White House today in the following statement:

"Director North tendered his resignation as director of the census. It was accepted, and Mr. E. Dana Durand, now deputy commissioner of corporations, has been chosen to succeed him."

Mr. North's resignation was based on the ground that on account of conditions existing and likely to continue, his administration of the census office would not probably be successful.

The announcement of North's resignation came close upon the heels of a conference that President Taft had today with Secretary Nagel, of the department of commerce and labor. It is understood that Mr. Nagel demanded North's head as the result of an investigation carried on by order of the President.

LORIMER GIVES
CONSENT TO RUN

SPRINGFIELD, Ill.—Lorimer has given his consent to use his name as a candidate for United States senator, and several ballots will be at once taken in an effort to develop his strength. Balloting will be continued during the day.

CLOSES RECORD
COKE CONTRACT

PITTSBURG, Pa.—The Jones & Laughlin Steel Company has closed the largest coke contract made for years, for 500,000 tons a year over a period of years.

PROVIDENCE PLANS "FOURTH."

PROVIDENCE, R. I.—Plans for a reasonable Fourth of July are being made by the city officials, and an appropriation of \$3500 has been made for the municipal celebration. This money will be expended by a special Fourth of July committee of the city council for fireworks at Roger Williams Park, athletic events and for an electrically illuminated parade at night.

COTTON EXCHANGE MAY BUILD.

MEMPHIS, Tenn.—The Memphis Cotton Exchange will hold a general meeting Saturday to consider the erection of an 18 to 20 story permanent home and office building on the present site.

DESTROYER ENDS TRIAL TRIP.

PHILADELPHIA—The United States torpedo boat destroyer Lieutenant Smith is here from her trial trip, which was begun almost 10 days ago. It is said that the vessel made more than 28½ knots, the contract speed.

SCHOONER PUTS IN, ABLAZE.

JAMESTOWN, R. I.—The three-masted schooner Aetna, bound from Georgetown, S. C., for Boston, with a cargo of lumber, was towed in here early today, with her afterpart ablaze.

BOSTON MERCHANTS
CLOSELY WATCHING
DRY GOODS COMBINE

Managers of Local Stores Discuss Unmoved the Fifty-One Million Dollar Delaware Morgan Merger.

NOTE ITS PURPOSE

General Opinion Is That the New Concern Will Not Try to Invade the New England Field of Business.

Merchants and heads of large dry goods concerns in Boston express doubt today that the \$51,000,000 dry goods concern just formed in Delaware contemplates operating in New England or has taken any steps toward acquiring the control of any local houses.

The consensus of opinion seems to be that the company is more occupied in merging the interests of smaller concerns found in the less important cities for the purpose of greater economy and facility in buying. Such cooperation, it is thought, would be greatly to the advantage of these smaller concerns, but the idea that large and firmly established houses could be injured or in the least affected by such a consolidation, even in Boston, is scouted.

H. Dutton of the Houghton & Dutton Company denied any knowledge of the purposes of the consolidation to operate in New England. E. G. Preston, treasurer of the R. H. White Company, and an official of the Jordan Marsh Company, made similar replies.

"It is possible that this new organization has already laid plans or taken aggressive action in Boston," said a prominent official of one large Boston store who, however, would not consent to the use of his name.

"Such things are generally done with the closest kind of secrecy and we may wake up some morning to find a surprise party prepared for us."

What such a revelation would mean to the Boston houses he did not profess to say, but expressed the firm belief that the stability of these institutions would be such as to insure them against injury, and that the whole sentiment of conservative New England opinion would be brought to bear in favor of the old concerns in disapprobation of the new and intruding combination. This he thought would amply protect Boston business from any undue competition, should the intentions of the new \$51,000,000 concern prove to be belligerent.

In spite of these reassuring reflections Boston interests are following the developments of the new consolidation in New York and elsewhere with keen interest. The general feeling is that the movement is an important one, but those in authority in the large concerns are reticent about expressing views for publication.

It is known today that J. P. Morgan & Co. are behind the \$51,000,000 dry goods combination incorporated in Delaware last Saturday. Although the company is capitalized at \$51,000,000, it will issue but \$20,000,000 at this time, of which one half will be preferred stock, and it is understood that this will be handled by Morgan & Co.

The combination will operate throughout the South and West, as well as in this city and vicinity. It has purchased outright Hahn & Co., Newark; the Powers Mercantile Company of Minneapolis; the William Hengeler Company of Buffalo and the Stewart Dry Goods Company of Louisville, according to those interested, and will later acquire others. In addition it will operate the H. B. Claffin Company, James McCreery & Co. and the O'Neil-Adams Company of this city. Stewart & Co. of Baltimore, J. N. Adam & Co. of Buffalo and will hold four fifths of the stock of C. G. Gunther's Sons of Fifth avenue.

BIGGEST MASONIC
FUNCTION IN YEARS

WEYMOUTH, Mass.—What promises to be the largest Masonic function that the south shore has had for years will occur on June 24, St. John's day, when 1000 visiting Masons from commanderies in Rhode Island and southern Massachusetts will be entertained by the South Shore Commandery Knights Templar of East Weymouth.

The visitors will arrive at South Weymouth by special train in the morning, go to Masonic Hall on Broad street, then form a parade and march through the principal streets.

Later they will enjoy a banquet at Nantasket beach and a sail about the harbor on a special steamer.

STEAMER IVERNA
NEARING BOSTON

A wireless message from the Cunarder Iverna received this morning gives her position at 10 p. m. Tuesday night as 325 miles off Boston light. She will probably dock Thursday noon. The big craft has 1576 persons aboard, of which 80 are saloon, 327 second cabin and 1169 steerage passengers.

News of the World Told by Cable and Correspondence

MANUFACTURERS' ASSOCIATION IS ON RECORD FOR PEACE

Canadian Organization Believes Efforts of Statesmen Should Be Directed Toward Furthering Arbitration.

TORONTO—The discussion which took place at the monthly meeting of the Canadian Manufacturers' Association brings out in strong relief Canada's determination to assist the mother country in the matter of naval defense, and also the divergent opinions as to the most effective method of doing so. It was fully recognized that the naval supremacy of Great Britain is today one of the most powerful influences working for the preservation of world-wide peace, and that in order to maintain that supremacy enormous expenditures were necessary, entailing heavy burdens on the British taxpayer. It was also maintained that it was the duty of the self-governing colonies in return for the protection they enjoy, to bear each a share of the expense.

The association commends the idea that the imperial conference discuss the subject exhaustively and evolve some plan of concerted action which will provide adequate defense for outlying portions of the empire, and at the same time place valuable auxiliaries at the disposal of the mother country in the event of international complications.

Should such a plan be agreed on at the conference, the association approves of the government acting on the finding without unnecessary delay. While considering these steps necessary under existing conditions the Canadian Manufacturers' Association placed on record its opinion that the best efforts of statesmanship should be directed toward furthering the laudable work of the Hague conference, and hastening the time when international differences of every kind will be settled, not by the right of might, but by the right of justice and equity, through arbitration.

RICH ORE BODY IN OLD WORKINGS

VANCOUVER, B. C.—One of the most important discoveries yet made in the Rossland gold mining district is in connection with the War Eagle mine. What is believed to be a million-dollar ore body has been found in a portion of the mine that was thought to be worked out long ago by the former owners. It is 400 feet long and 50 feet wide, and the 3000 tons already taken out have averaged \$30 per ton.

AT THE THEATERS

BOSTON.
CASTLE SQUARE—The Grisham.
COLONIAL—A Stubborn Chatterbox.

PRINCE'S—The Prince of Tonight.
WHEATLEY OPERA HOUSE—The Bachelor.

BRITISH COMPANY TO IMPROVE PLANT

Lines Owned in Canada to Be Bettered by Expenditure of Two Million Five Hundred Thousand Dollars.

VANCOUVER, B. C.—The British Columbia Electric Railway Company, which is owned by British capital, and whose head offices are in London, has announced the expenditure of \$2,500,000 in this city and vicinity during the present year. This is looked upon as an evidence of the strong faith of English investors in the future of this province. One half of this amount will go toward the construction of new tram lines in and about the city; \$250,000 will be appropriated for the installation of a new 10,000-horsepower water wheel and electrical unit at Lake Brewster, and \$200,000 for the construction of the Coquilam dam, the permission for which was recently obtained from the provincial government.

A \$150,000 freight terminal will be erected on the north shore of False Creek, and \$200,000 for a new office building at Carrall and Hastings streets, the ground floor of which will be used as a terminal passenger station. The balance of the appropriation will be used in the general improvement of its lines, and in electrifying the road from New Westminster to Eburne, which was recently acquired from the Canadian Pacific Railroad. The passenger traffic of the company increased 50 per cent during the past year.

TO VOTE ON UNION.

PIETERMARITZBURG, South Africa.—It is announced in the Gazette that the referendum to decide whether Natal shall enter the Union will be held on June 10, and that Parliament will meet six days later. Natal is the only South African colony thus far to transfer the responsibility from Parliament to the electorate.

ENCOURAGING REPORT ISSUED AS TO TRADE OF PORT SUDAN

Prospects Are Bright for the Future—City Built to Meet Future Commercial Needs of the Country—Steady Growth Indicative of What Is Expected.

PORT SUDAN, Egypt.—A report of the trade of this port for the year 1908 recently issued by the government, is encouraging not so much on account of present business conditions revealed, as on account of the prospects that are indicated for future trade. It is stated that the results for the year are neither better nor worse than was to be expected. The total value of imports for the whole Sudan for 1908, including goods brought in by way of Egypt, was 1,097,000 pounds Egyptian, while the exports were valued at half a million pounds. If these figures appear small when compared with those of other countries, it should be taken into consideration how recently the Sudan has emerged from a condition bordering on savagery, possessing neither industries nor cultivation. Port Sudan has been built to meet the future commercial needs of the country, and the small but steady growth recorded is taken as an index of the development that may be expected in the next quarter century, the magnitude of which can hardly be predicted. The United Kingdom is far and away

JAPAN AND CHINA START MUSEUMS

Japan is establishing commercial bureaus and museums throughout the far east. There are now about 40 of these, including many in Japan. One is located in Korea, another at Singapore, and a third at Bombay. Similar museums have been started in Hankow, Chungking, Shashi, and elsewhere in China, and one was recently opened in Bangkok. Of the local institutions, the largest are in the big cities of Tokyo and Osaka. The Tokyo museum fills nearly all of a large three-story building, and it has about 25,000 samples of foreign and native-made goods, says the San Francisco Argonaut. It contains all kinds of foreign raw materials and manufactured products, shown side by side with those of Japan. There are large displays of machinery and electrical works of home manufacturers, and of all sorts of metal articles, from aluminum to iron.

FRENCHMAN HAS NEW TYPE OF SHIP

PARIS.—M. Painleve, president of the aeronautic commission of a French academy, today presented for inspection to his fellow servants a new model of an aeroplane invented by M. Maurice Caron. The chief feature of the apparatus is that it is only seven feet wide. Its surface is composed of small laths like those of a venetian blind two centimeters (13-16 in.) wide and one centimeter apart. Change of direction is obtained by inclining the body as when riding a bicycle. Experiments with the new aeroplane have shown, it was declared, that it is possible to carry a weight of 50 pounds at a speed of nearly 40 miles an hour with a supporting surface of one square yard.

Island of Ceylon Owes Much to Irrigation

KANDY, CEYLON, FROM A HEIGHT.

This interior town, the seat of the native kings of Ceylon, the "utmost Indian isle," is about 75 miles from Colombo. A fine military road and a prosperous railroad connect the two towns.

KANDY, Ceylon.—The interior of the island of Ceylon is probably as attractive to view as any country in the world. A number of lakes, some large and some small, and all of great beauty, are scattered about through the interior, while an artificial system of irrigation in the days of the ancient rulers covered the whole country with a network of reservoirs, canals and sluices that enabled the island in olden times to hold its place as the granary of southern Asia. The remains of some of the larger works furnish some of the most interesting as well

as the most picturesque bits of Ceylon scenery. The embankments have been formed with great skill, and the efforts of the British government to restore these water works promise an era of prosperity equal to or exceeding that of the day that is passed.

The kings of Kandy, situated in the interior of the island, were powerful potentates, and their friendship aided the Dutch materially in prevailing over the Portuguese, who occupied the west coast of Ceylon. The island passed into the hands of the English late in the eighteenth century and the royal govern-

ment at Kandy was only abolished at the request of the mass of the population.

What is said to be the most prosperous line of railroad in the world for its length—75 miles—is that running from Colombo to Kandy. It is remarkable for its beauty and for engineering skill displayed in its construction. Its ruling gradient for the first 50 miles is 1 in 100; the line then rises for 12 miles with a gradient of 1 in 45 throughout and curves of ten chains radius, to a height of over 1500 feet above the sea level.

CANADIAN ALPINE CLUB WILL CAMP AT LAKE THIS YEAR

BANFF, Alberta.—The Canadian Alpine Club expects the present year, which is the third of its existence, to be a notable one. The program for this season, in addition to the opening of the new clubhouse, includes a visit from a number of eminent members of the British Association which meets in Winnipeg this summer. These are members of the Alpine clubs of Great Britain and will be under the leadership of Professor H. B. Dixon, F.R.S., of the University of Manchester.

The Alpine Club of Canada now numbers 450 members, among whom are residents of Great Britain, Australia, South Africa, India, and the United States. Each year the club holds a camp at some point in the Rockies, and these mountaineering camps are the largest ever held, the last camp having numbered 177 persons. The camp this season will be at Lake O'Hara, at an altitude of 6,664 feet above sea level. The official climbs for graduating members will be: Mt. Odlary, 10,165 feet, and Mt. Huber, 11,041 feet.

The objects of this club are to impress Canadians with the importance of their mountain inheritance in the Rockies, to develop the love of mountain climbing, to create a literature and art in connection with the Rockies, and incidentally to advertise their attractions. President Wheeler has been elected an honorary member of the British Alpine Club which is the first time this honor has been conferred upon one from the British colonies.

SWEDEN'S FAIR TO OPEN IN JUNE

STOCKHOLM.—The first public exhibition in Sweden of industrial arts and crafts will be opened here on June 4. The exhibition will be under the special patronage of King Gustaf, and Prince Eugene is honorary president of the committee. The ground is perhaps the most beautiful that could be imagined, being situated in a valley of the Royal Park of Djurgården. A guiding principle in planning this exhibition has been the carrying out, as far as possible, of the "Interior System"—the displaying of the articles in the surroundings to which they are adapted. The work was executed by M. Ferdinand Boberg, Sweden's most eminent architect.

Foreign Briefs

BRUSSELS.—The National Museum has purchased King Leopold's Van Dyke portrait for \$30,000, and is negotiating for a Rubens, for which the King asks \$200,000.

CAPE HAITIEN.—The Santo Domingo government is proceeding against the revolutionists as rapidly as possible.

PARIS.—Miss Nina Fletcher, a young violinist of Newton, Mass., in her first concert met with great success.

FRANCE TO HAVE LEARNERS' LAW

Apprenticeship System Subject of Investigation by a Commission Which Has Reported Draft of Law.

PARIS.—The apprenticeship system of France will probably undergo a change in the near future if the parliamentary commission's report is adopted. The general rule in this country has been for the future workman to pass through a course of apprenticeship, a custom which has prevailed from time immemorial. But it is becoming more and more obsolete. The consequences are that the level in professional skill and competence is being lowered and all are now agreed that the discovery of some remedy is a matter of extreme urgency.

The report of the parliamentary commission appointed to make inquiry into this question has just been published, together with the draft of the proposed legislation on this subject.

The remedies unanimously demanded are as follows: 1.—That it be made compulsory for all young persons of both sexes, under 18 years of age, who may be employed either in commerce or industry, to attend courses of technical instruction. 2.—These courses are to take place in the daytime, upon days and at hours determined for each locality by committees composed of representatives of the municipal authorities, the associations of manufacturers, and of the workpeople. The selection of the dates and hours in question is to be made in such a way as to accord best with the respective interests of the manufacturers and the educational requirements. Employers will be bound to enable their workpeople to set apart sufficient time to attend the classes. 3.—The course of instruction is to be adapted in each district to the requirements of the local trades, and is to be so chosen as to train up skilful workers and competent assistants, thoroughly versed in the technical knowledge of their respective occupations.

MULAI HAFID IN STATEMENT GIVES REASONS FOR DELAY

Pleads as Excuse for Deferring Enforcement of Article Sixty of the Algiers Act That State of Insecurity Still Exists in Morocco.

FEZ, Morocco.—The Sultan Mulai Hafid in a recent statement pleads as an excuse for his having deferred putting into force Article 60 of the Algiers act, which permits Europeans to purchase land in the vicinity of the Moorish coast towns, that the state of insecurity still existing in Morocco renders the purchase of land by Europeans, and more particularly their residence at any distance from towns, extremely dangerous.

The Sultan also desires it to be remembered that his accession to the throne at Fez is but of recent occurrence, at a time of absolute anarchy, and that he has not yet had time to consolidate his authority, or make a journey through his dominions. He has, however, undertaken at the instigation of the representatives of Britain, France, and Spain to issue the necessary orders for the putting into force Article 60 on his arrival at Rabat, which will be the first stage of his progress through Morocco.

He also calls attention to the fact that article 1 of the Algiers act which guarantees the integrity of his country has been somewhat overlooked in Europe, as several portions of his empire are still occupied by foreign troops. He trusts that his friendly relations with

the French government will facilitate negotiations and bring to a satisfactory conclusion the evacuation of the Shawia district and Ojda.

Claims and debts to the subjects of all powers, when adjudged just by the commission now sitting at Tangier, will be forwarded to his majesty at Fez, who will shortly make such financial arrangements as will lead to their satisfactory liquidation.

The Sultan concludes with a plea for patience on the part of Europe, urging that time be given him to put down internal troubles. He declares his army is not strong enough to guarantee universal security, and that the tribes misjudge his every word and action, which tend toward progress in all cases where foreigners are concerned. His desire is to restore absolute order and facilitate trade and thus promote the prosperity of his country.

Haj Mahomed-el-Mukri and Sed Abdullah Fassi have left Fez for Tangier on their way to Paris to treat with the French government the various questions pending between the two countries, and especially to settle for the evacuation of the Shawia country and Ojda, and the amelioration of the financial situation.

TROPICAL CROPS AID QUEENSLAND

The Agricultural and Livestock Report Shows Great Success in Farming in the Province.

Good progress has been made in agricultural industries in Queensland, according to the report for the year 1907-8 of the department of agriculture and live stock of that colony. Bananas, pineapples, oranges and mangos are cultivated over increasing areas.

In 1905 there were 6198 acres under bananas in Queensland. The crop increased from 1,343,033 bunches in 1906 to 1,502,636 bunches in 1907. The average return for the whole state was 302 bunches per acre. In the past ten years the pineapple industry has undergone good development, the area under cultivation having increased threefold, says the London Morning Post.

The total orange area of the colony amounted to 3168 acres, from which 514,751 bushels of fruit were gathered in 1907, as against 266,600 bushels gathered from the bearing acreage of 1906. Mangos have also been planted in Queensland over 380 acres, the crop from the area that has reached the fruiting stage (308 acres, being 201,741 bushels in 1907).

TRAFFIC ON SUEZ CANAL. During the first three months of the current year, 1059 steamers passed through the Suez canal paying transit and passenger dues to the extent of 29,724,500 francs, says the Egyptian Gazette.

DOMINION TRADE MUCH IMPROVED

OTTAWA.—The recently issued trade returns of the Dominion for April, the first month of the fiscal year, show a continued improvement. The total trade for the month amounted to \$34,998,834, an increase of \$4,028,267 over April of last year. The imports for the month totaled \$22,531,673, an increase of \$2,609,078. The exports for the month totaled \$11,862,797, an improvement of \$1,567,969. The customs duty collected during the month amounted to \$3,778,480, being a betterment of \$490,759.

BERLIN COMPANY BETTERS WIRELESS

BERLIN.—It is reported here that the German Wireless Telegraph Company has invented a system which it claims does away with the existing hindrances in wireless communication. By this system, it is maintained, signals are forwarded in such a way that however weak the vibrations they have always been recorded. This new system also requires much smaller receiving wires than are used at present.

HEAVY BATTING BY PHILADELPHIA BEATS CLEVELAND

St. Louis Shuts Out Boston, While Detroit Easily Defeats Washington, Hitting Groome Hard.

NO CHICAGO GAME

AMERICAN LEAGUE STANDING.

	Won.	Lost.	P.C.
Detroit	21	11	.656
Philadelphia	18	11	.621
Boston	17	13	.567
New York	17	13	.567
Chicago	15	17	.469
St. Louis	14	16	.467
Cleveland	12	19	.387
Washington	8	22	.267

GAMES TODAY.

Boston at St. Louis.
New York at Chicago.
Washington at Detroit.
Philadelphia at Cleveland.

Heavy hitting on the part of Philadelphia defeated Cleveland Tuesday by a score of 13 to 2. St. Louis shut out the Boston team, 5 to 0. Detroit knocked Groome out of the box in the fourth inning, defeating Washington, 7 to 4. The Chicago-New York game was postponed.

CLEVELAND'S RUNS ON ERRORS.

CLEVELAND—Hitting both Falkenberg and Rhoades and backing up Bender in an almost perfect exhibition of base-ball, Philadelphia took the second game of the series here Tuesday 13 to 2. The two Cleveland runs were the result of the visitors' only slip. Barry overthrew second in the second when Stovall grounded to him following Lajoie's single, and Lajoie scored and Stovall reached third, whence he scored on Hinchman's sacrifice fly to Murphy. The score:

Innings.....	1 2 3 4 5 6 7 8 9	R.H.E.
Philadelphia.....	0 0 0 0 0 0 2 2 13	14 0
Cleveland.....	0 2 0 0 0 0 0 0 2	4 1

BOSTON SHUT OUT BY ST. LOUIS.

ST. LOUIS—St. Louis defeated the Boston team Tuesday, 5 to 0. Six base hits off Graham, scattered through the game, gave the visitors no chance to make a run. Morgan pitched for Boston for six innings, allowing 11 hits and 4 runs. Ryan, who took his place, gave 3 hits and 1 run. The score:

Innings.....	1 2 3 4 5 6 7 8 9	R.H.E.
St. Louis.....	0 0 0 0 0 0 0 0 5	14 0
Boston.....	0 0 0 0 0 0 0 0 0	6 1

MULLIN WINS EIGHTH GAME.

DETROIT—It looked as though Washington might stop the winning streak of Mullin up to the fourth inning, but in this inning four runs were made by the home team and Groome was replaced by Tannehill. Washington played good ball, having but one error charged them. The score:

Innings.....	1 2 3 4 5 6 7 8 9	R.H.E.
Detroit.....	0 0 1 4 0 1 0 1 7	10 0
Washington.....	0 1 1 0 0 1 0 1 4	6 1

CHAMPION SMITH PLAYS IN FINALS

The annual meeting of the New England Intercollegiate Tennis Association was held last night at the Brunswick Hotel, and the following colleges were represented: Technology, Amherst, Williams, Brown, Vermont, Bowdoin, Dartmouth, Wesleyan and Trinity. L. Richardson of Brown presided. By a unanimous vote Colby College of Waterville, Me., was admitted to the association.

The following officers were elected: President, S. B. Smith, Dartmouth; vice-president, W. M. Holton, Wesleyan; secretary and treasurer, T. B. Parker, M. I. T.

One match in singles and one in doubles were played on the Longwood courts Tuesday afternoon. Smith, the present champion, defeated Coville of Technology 6-3, 6-2 in the singles and Smith and Harris, Dartmouth, defeated Wychoff and Smithers, Amherst, 6-2, 7-5.

Smith, the present champion, won his way into the finals this morning by defeating Budlong of Brown two sets to one, 6-1, 4-6, 8-6. One match in doubles was played this morning, resulting in a victory for Williams. The scores:

Semi-finals, singles.
Smith, Dartmouth, defeated Budlong, Brown, 6-1, 4-6, 8-6.
Third round, doubles.
Benton and Roper, Williams, defeated Nelson and Burghin, Trinity, 6-4, 11-9.

COLUMBIA CAPTAINS ELECTED.

NEW YORK—Theodore S. Babcock '10 has been elected captain of the Columbia track team. Babcock has been a member of the varsity team since his freshman year as a pole vaulter and high jumper. F. B. Ackerman '10 was chosen captain of the lacrosse team for the season of 1910.

TEAM CAPTAINS ELECTED.

ANNAPOLIS, Md. — The following team captains have been elected at the naval academy: Fencing, Robert T. Merrill, Peabody, R. L.; gym, Walter D. Lamont, Niagara Falls, N. Y.; wrestling, Homer B. Gilbert, Marshfield, Mo.

THIRTY-SEVEN TURN IN CARDS

Miss M. B. Adams Has the Lowest Score in Qualifying Round for Women's Golf Championship.

The match play will start on the links at the Oakley Country Club today in the tenth annual championship meeting of the Women's Golf Association of Boston. Tuesday was devoted to the qualifying round, and in all 37 of the 39 entered turned in cards. Thirty-six qualified to play in the five different divisions. The low score of the day went to Miss Mary B. Adams of Wollaston, who had a 92 for the 18 holes.

Miss Katherine Harley of Fall River, national champion, was in the play, and qualified in the championship division with a 98. Miss Margaret Curtis, former national champion and present state champion, also qualified. Miss Adams played her usual brilliant game and is a favorite for the title.

CHAMPIONSHIP DIVISION.

Mrs. G. W. Roope, Brae-Burn, vs. Mrs. E. G. Davis, Country; Miss C. S. Shreve, Brae-Burn, vs. Miss Alice Bradford, Concord; Miss G. Paine, Weston, vs. Mrs. H. S. John, Brae-Burn; Miss M. W. Phelps, Brae-Burn, vs. Miss Gertrude Rogers, Allston.

CONSOLATION DIVISION.

Miss C. L. Duncan, Brae-Burn, vs. Mrs. A. McGregor, Oakley; Miss C. Shreve, Brae-Burn, vs. Miss Alice Bradford, Concord; Miss G. Paine, Weston, vs. Mrs. H. S. John, Brae-Burn; Miss M. W. Phelps, Brae-Burn, vs. Miss Gertrude Rogers, Allston.

COLLEGE GAMES TODAY.

Rutland vs. Villanova.

YACHTING NOTES

The Hingham Y. C. will open the season by a race for one-day boats on Memorial day.

The house opening of the Eastern Y. C. at Marblehead will take place on Thursday and that of Corinthian Y. C. on Saturday.

The Fall River Y. C. will hold a Memorial day regatta, including a motorboat parade. The event will include a trial race to select coxswains to take part in the inter-bay cat races, to be held in Barnegat bay on July 22.

The first powerboat race of the Jubilee Y. C. of Beverly will take place on Decoration day. The race will be a handicap with allowances figured on trials run over the club course. The race will count one leg in the Vittum cup match. The victor will be awarded a special cup by the Hon. Francis Norwood.

SHAWMUT AUTO ON LONG TRIP

At noon today the Shawmut car, which is to do battle in the ocean to ocean race, starting in New York on Tuesday next, left Boston en route for the scene of the start. Postoffice square was the point from which the car started, and Pettigill and Capin, the men who are to do the great work of the contest, received a royal sendoff by the men of the business and commercial district. The car and the men are in the best of condition, everything having been done to overcome every exigency that may arise during the trip. The men are to take the car over the roads to New York, which they expect to reach before midnight.

EXPECTED TO WIN SHOT-PUT.

C. C. LITTLE 1910.
Harvard University track team.

MISS BISHOP LEADS FIELD

NEW YORK—In the preliminary round of the tenth annual championships of the Metropolitan Women's Golf Association at Nassau Tuesday Miss Georgiana Bishop of Brooklawn, the title holder, turned in the best card for the 18 holes. Miss Julia R. Mix and Miss Elizabeth Hurry, a pair of Englewood entrants, with totals of 96, were next, while Mrs. M. D. Paterson of Baltusrol was the fourth player to get round in less than 100.

Mrs. E. F. Sanford of Essex county, president of the Women's Eastern Golf Association, and Mrs. F. A. Faith of Dunwoodie tied for eighth place with scores of 107. In the play off Mrs. Sanford won with a 4. The cards of those qualifying were:

MUCH INTEREST IN BERMUDA RACE

Neither of Last Year's Winners Expected to Start From Sea Gate in Coming Race.

NEW YORK—The annual race of sail and power boats to Bermuda will start from Sea Gate (Lower Bay) June 5. Last year the race started from Marblehead. The schooner Verona was the winner among the sailing vessels and the famous Ailsa Craig was, for a second time, the winner among the power boats. It is not likely that either of these boats will race this year. The Verona was entered but subsequently withdrawn and the Ailsa Craig changed hands only last week. What her new owner will do with her is not yet known.

When the Bermuda races were first initiated in 1906 there was much shaking of heads and unfavorable comments as to the danger of so tempting the deep. Now, however, almost all prejudice has vanished and the race is one of the most popular events of the season. True, stanch boats and hardy crews are necessary, but this only adds to the fun for true sportsmen. The interest in this year's race promises to be unparalleled.

The motor boat race is held under the auspices of the Motor Boat Club, J. N. G. Whitaker's new 50-foot power boat will be one of the contestants for the trophy, which must be won three times to become the property of the winner. She was designed by Thomas Bowes and is 50 feet 3 inches over all and has a 25-horsepower engine. She will also carry a jib and a gaff-headed storm trysail. Her owner is a member of the Yachtmen's Club of Philadelphia and formerly owned the schooner Iroquois with which he won the Cape May trophy five years ago. Thomas Fleming Day will sail her.

The Nerides II, owned by Francis C. Rogers of Philadelphia, is another entry. She is 65 feet long and has for motive power a 45-horsepower engine. Walter M. Bieling will sail her. Two other boats of duplicate type, the property of Richmond Levering and William C. Proctor, both of Cincinnati, have also been entered. These boats were designed by Theodore W. Biglum and are 58 feet over all, being equipped with 40 and 50 horsepower engines respectively. Commodore C. M. Slagel of the Baltimore Yacht Club will also sail in his new power boat designed by L. J. Nilson.

The race for sailing boats is held under the auspices of the Atlantic Y. C. of Sea Gate. It is open to boats of 90 feet length over all and under. The entry list has met with considerable change during the last month, several former entries having been withdrawn. The list now contains George S. Runk's 93-foot schooner Margaret (N. Y. Y. C.), a boat built by Lawley in 1903 and of the design of Arthur Binney; Edwin Palmer's 93-foot schooner Crusader II (Atlantic Y. C.), also built in 1903, H. C. Wintingham designer; T. Doremus Lasso (Atlantic Y. C.), and Dr. Leedom Sharp's little 35-foot Restless (Yachtmen's Club of Philadelphia, the smallest schooner entered. Capt. Charles Barr will have charge of the Crusader II.

H. A. Boucher, chairman of the regatta committee of the Atlantic Y. C., has also announced the entry of Max A. Mosely's 98-foot schooner Iroquois, a Cary Smith boat with a notable racing history. Dr. W. L. Baum's auxiliary schooner yacht Amorita and the Verona and the Snug, which had been entered for the race, may not sail. The list remains open until June 1.

TWO RECORDS ARE BROKEN AT YALE

NEW HAVEN—The intercollegiate team record was broken at the shoot Tuesday between the Yale and Princeton gun clubs. Yale winning 232 to 209. Another record was made by Hebard of Yale, who broke 50 out of a possible 50.

YALE PRINCETON.

News in Brief Gathered Today from
Towns and Cities in Massachusetts

WOBBURN.

Tonight at Trinity Church the Tusitala Club will present the drama "Mrs. Oakley's Telephone."

Success appears certain for the society circus to be given at Forest park by the Woburn Women's Club on June 17. There will be the usual circus parade and all the features of a regular circus will be on hand. The committees are hard at work and are well pleased with the support they are receiving on all sides.

The Holly Club met Tuesday evening at the home of Miss Margaret McGovern on Church avenue.

Mr. and Mrs. George W. Hart have returned from a visit to San Francisco.

Woburn high plays two games next week, Tuesday, Reading at Woburn and Wednesday, Saugus at Woburn, the latter a league game.

The school committee held its regular monthly meeting Tuesday evening.

Auxiliary 66, S. of V., through its patriotic instructor, Mrs. Mina Fresh, presented flags in two rooms at the Hanson, and one at the Plympton schools.

Dr. Benjamin Lewis and party have returned from a fishing trip in the Moosehead lake regions. They report having had a very pleasant time and that there was good fishing.

The entertainment to be given by the Social Workers of the Montvale Congregational Church this evening will include a baked bean and salad supper followed with a musical and literary program with a group of songs by Miss King, readings by Mrs. Hosmer and Miss Emily Perkins, the program to close with a grand spelling match.

CAMBRIDGE.

The graduating exercises of the Theological Institute, Austin street, were held in Prospect Street Church Tuesday afternoon. Dr. F. E. Emrick and the Rev. William Macnair delivered addresses.

The ninetieth anniversary of the Woman's Home Missionary Society of the First Church, Congregational, will be celebrated this evening by a social gathering of that society and the Men's Union.

Henry G. Peabody lectures on "The Seashore of New England" in the hall of the Harvard grammar school Tuesday afternoon.

The Merle Teale Alliance will hold its second annual May festival this evening.

BROCKTON.

The Hancock Veteran Firemen's Association has voted to enter the machine for the muster at Salem June 17.

Campello lodge, I. O. O. F., and Aurora Rebekah lodge will hold a joint memorial service some Sunday in June.

General Secretary Benjamin F. Pierce of the Y. M. C. A. will start this week for Omaha to attend the national Y. M. C. A. convention.

The Womans Club has engaged Prof. George Baker of Harvard University to give an address on "The Child and the Theater" in the coming year.

SOMERVILLE.

A strawberry festival will be given in the Perkins Street Baptist Church this evening under the auspices of the H. C. White Men's Class of the church.

The ladies' auxiliary of the Broadway Congregational Church announce that they have collected over \$100 in the "Mite" boxes.

An entertainment and strawberry supper will be given in the Flint Street Church vestry this evening under the auspices of the Ladies' Aid Society.

WOBBURN TEACHER
RESIGNS POSITION

WOBBURN, Mass.—The resignation of Miss Ida E. Sawin, head of the high school English department, has been accepted by the school committee. Miss Martha A. Putney, Miss Catherine B. Corry, Miss Margaret Burnap, Miss Alice E. Flagg, Miss Edith L. Gott and Miss Blanche L. Blackburn have been reelected as teachers not yet under the tenure of office clause. Miss Ellen H. Bartlett was reelected supervisor of music in the public schools.

George H. Low was again chosen principal of the high school, and Maynor D. Brock was reelected submaster at the high school. Miss Charlotte R. Lowell, teacher of stenography and typewriting in the high school; Miss Florence M. Kennedy, teacher of the sixth grade in the Hanson school, and Miss Ada B. Dorr, teacher of the third and fourth grades in the Plympton school, were elected under the tenure of office clause. The date for the graduation exercises of the high school has been fixed for Monday evening, June 28. The address will be delivered by the Rev. F. W. Hamilton, president of Tufts College.

DALTON Y. M. C. A.
CONTRACTS OUT

DALTON, Mass.—A contract has been awarded for the construction of the new Y. M. C. A. building, a gift to the Dalton association by Senator W. Murray Crane, Zenas Crane and Frederick G. Crane of Dalton.

The building will be located on Carson avenue, near the town building. It will be of brick, brownstone trimmings. The association building will be of modern construction and adapted in every way to the growing needs of the association, which is doing a large and important work. The gift will represent more than \$30,000.

NEWTON.

The Polymnia will hold its last guest night for the season at the home of Mrs. William Price on Page road, Newtonville, this evening.

The annual May festival of the Eliot Church Sunday School will be held tomorrow afternoon.

A confirmation service will be held at the Church of the Messiah this evening when Bishop Lawrence will confirm candidates.

A meeting of the Auburndale Brotherhood will be held this evening at the Congregational Church and an address will be delivered by General Anderson. There will be a special musical program.

HYDE PARK.

The Business Men's Association has appointed a committee to report on the subject of widening the main streets and opening new streets to other towns. The members are John Johnston, Fred R. Hill, Henry Cotter, J. T. Robinson and Clarence G. Norris.

The Hyde Park Educational Society has elected as president Charles L. Alden; secretary, Emerson Rice; treasurer, Mrs. Arthur W. Savage; directors, James R. Corthell, John F. Eliot, William A. Mowry and Mrs. George B. Dowley.

The high school team plays Boston College high school here this afternoon.

The Rev. Guy C. Lamson, pastor of the First Baptist Church, has received a call to the Second Baptist Church in Fall River.

MALDEN.

The last meeting of the season of the Malden Deliberative Assembly will be held Saturday evening, when the subject for debate will be: "Resolved, that the age limit for admission to the public schools should be five years." Ernest S. Butler and James Donovan will speak in the affirmative and Joseph Wiggin and Frank E. Drew in the negative.

The first degree staff of John Hancock lodge of Odd Fellows of Woburn will visit Malden tonight.

Beginning today the Faulkner line of cars will run from the Sullivan square car barns instead of the Salem street barns in Malden.

WALTHAM.

The fourth of July committee will meet this evening at the police station and plans for the celebration will be arranged.

Supt. Leroy Brown of the water department started work today on the removal of the cement pipe on Forest street and will replace the same with iron pipe.

Chief George L. Johnson of the fire department has started on his semi-annual inspections of the cellars.

The last regular meeting of the Watch City Debating Club this season will be at the Fales House this evening.

TAUNTON.

The annual convention of the Taunton District Sunday School Association will be held May 27 in the Methodist church, Attleboro. W. R. Park, Jr., of this city, vice-president, will respond to the Rev. Sherman E. Ellis's welcome.

There will be no improvements made in the Taunton river this year. The committee on harbors has reported leave to withdraw on a bill asking for \$10,000 for improvements.

Simon Swig, chairman of the board of aldermen, is advocating an old home week for this city.

MEDFORD.

Owing to increased number of visitors to Middlesex Falls, three new police, William Lavoie, T. F. White and J. J. McLean, will be put on after June 1.

Mayor Brewer has refused the Lowell & Lawrence Electric Railroad Company permission to run a line through Medford on any elevated embankment, but if plans are changed proper consideration will be given.

Next Saturday girls from the high school will visit all houses, each with a box, to procure funds for the supervision of physical training in the schools.

BOSTON BRIEFS

Steps toward the organization of a local branch of the American Home Economics Association were taken late Tuesday afternoon in the Walker Building of the Massachusetts Institute of Technology. Mrs. Ellen H. Richards, president of the national association, presided and was authorized by those present to appoint a committee to report a definite organization plan by October.

The Rev. Charles F. Dole and Gorham D. Gilman will speak upon Hawaii at the closing luncheon of the Twentieth Century Club for this season on May 29.

PORTLAND CITY HALL REPORT.

PORTLAND, Me.—Mayor Leighton has called a meeting of the city council for this evening at which time the finance committee will make a report upon the building of the City Hall. The finance committee will advise the sale of the Portland & Ogdensburg stock at \$50 a share or more.

PANAMA EXILES SAIL AWAY.

PANAMA—Santiago Roza, General Acosta and Lopez Lemaz, three of the Colombians ordered deported from Panama for conspiring here against President Reyes of Colombia, have sailed on a German steamer for New York.

FALLIERES A GRANDFATHER.

PARIS—Mme. Jean Lanes, daughter of President Fallieres, has given birth to a son. It is President Fallieres' only grandchild.

VOTE ON CHARTER
BILL IS DUE SOON

(Continued from Page One.)

in convention, both being, in his estimation, only efforts to return to the old boss system.

Mr. Fay dramatically asked Mr. Cushing, who is in charge of the bill for the committee, if it was not a fact that before the bill was reported, Mr. Cushing asked members to favor the bill and kill all amendments.

Mr. Cushing replied that he was glad to repeat his request to all members to pass this bill and kill all amendments. Mr. Fay thought it might be well to release their members from their promises under the circumstances, but Mr. Cushing's only reply was that he felt sure the men who have given their promise will keep their word.

Mr. Keene of Somerville believed this charter the best possible compromise. While it has defects, he believed its benefits are many times as great.

Mr. Mellen of Worcester said the Republican party members think now that the bill will help to give them a grip on Boston, but predicted that as a matter of fact it will destroy the city organization.

Mr. Midram (Republican) denied that his amendments are offered for the purpose of killing the bill, and insisted that they are presented in a sincere effort to improve the provisions of the bill.

He said for years it has been the practice of members of the Legislature to permit the representatives from each city to settle all questions as to the government of their cities, and he thought it ought to be followed in this case.

He quoted Mr. Cushing as having admitted that the Midram amendments would better the bill, but as saying that he must oppose them because they would endanger the passage of the bill.

Mr. Breed of Lynn favored the bill, especially the publicity to be obtained through the permanent finance commission.

The House then took a recess.

BILLARD CHARTER
ACTION PUT OVER

Connecticut Legislature Takes up Amendments Affecting B. & M. Holding Company and Then Postpones All.

HARTFORD, Conn.—The House of Representatives of the Connecticut Legislature today took up the question of the charter of the Billard Company, which is to be a holding company for the majority stock of the Boston & Maine Railroad, and finally wound up without taking definite action, making the matter the order of the day for next Thursday at 12 o'clock.

The name of Fred Billard was substituted for that of Frank T. Brown of Norwich as one of the incorporators and two amendments offered by Representative Bishop of New Haven were passed. The House was in the midst of a discussion of a third amendment when the matter was put over.

The Bishop amendments provided that the holding company shall not bond to an amount greater than 75 per cent of its capital stock outstanding and that there shall be filed in the office of the secretary of state of Connecticut a duplicate of the schedule of values recorded on the company's books when the directors purchase any property.

The third amendment submitted by Mr. Whiton of New London limits the company's stock, bonds and other evidences of indebtedness to \$20,000,000.

SCHOOL CHILDREN
TO HEAR SOLDIERS

The public schools of Somerville will be visited Friday by the following members of the Kinsley Post, G. A. R., who will speak on the civil war and its lessons:

Latin school, C. H. Colgate; English High, G. B. Clark; Prescott, W. H. Fish; Knapp, G. M. Houghton; Pope, F. H. DeWolf; Edgerly, G. H. Clapp; Glines, C. D. Dean; Bell, C. H. Colgate; Foster, G. W. Pierce; Carr, H. B. Sellen; Morse, J. J. Fitzgerald; Bingham, G. W. Pierce; Brown, J. P. Abbott; Highland, J. W. Sproule; Hodgkins, E. M. Norton; Burns, J. J. Fitzgerald; Hanscom, Thomas Murphy; Bennett, G. K. Walcott.

TARIFF FAVORED
ON CRANBERRIES

WAREHAM, Mass.—Cranberry growers of Cape Cod want the tariff on cranberries retained, it is reported. Several years ago a tariff of 25 per cent was placed by the Canadian government on cranberries entering that country from the United States. When the Dingley law was enacted provision was made for an equal tariff on Canadian berries which entered the states. This evening matters, and the growers are said to be anxious that the duty should continue.

PITTSBURG BRIBERY SENTENCE.

PITTSBURG, Pa.—Charles S. Cameron, president of the Tube City railway, was sentenced this afternoon to serve two years in the western penitentiary and pay a fine of \$500, for offering a \$70,000 bribe to William A. Martin, a common councilman.

MALDEN WOMAN A LEGATEE.

MALDEN, Mass.—Mrs. Anna M. Smith of Elmwood Park has been informed that under the will of her uncle, Henry B. Howell of Trenton, N. J., she was to receive in the vicinity of \$40,000 and her three children \$2,000 each.

Woburn Municipal Building Greatly Resembles Church

One of Oldest Communities Among the Suburbs of Boston Has Many Quaint Structures.

DEPOT IS MODERN

WOBBURN, Mass.—This city is one of the oldest communities among Boston's suburbs and some of its municipal buildings are quaint. The two buildings shown in one of the accompanying pictures are not churches, as they are sometimes taken to be, but one is the city hall and the other the court house and police station.

BOSTON & MAINE STATION AT WOBBURN.

Among the modern buildings one of the most artistic is the Boston & Maine railroad station. This depot, with its beautiful surrounding grounds, affords newcomers a favorable impression of the city, which is borne out by some of the handsome homes in the residential section.

Previous to the incorporation of the city in 1880, the structure on the left of the picture, now known as the Municipal Building, was formerly the old Central Grammar School.

The second building, which is now used as the police station and the fourth

MUNICIPAL BUILDING (LEFT) AND COURT HOUSE (RIGHT).

MIDDLESEX DISTRICT COURT AT WOBBURN.

Middlesex district court, was at one time the armory of the old Woburn Mechanics Phalanx, a military organization long since merged into company G, fifth regiment.

Both buildings are wooden structures, lighted by electricity and fitted with every modern convenience. Opposite these structures is the site of the first church in Woburn, built 200 years ago, but since demolished. Subsequently this piece of land was used as a military training-ground for the old Mechanics Phalanx, but has since become common land.

ASSURE NEW LINE
IN GRANITE STATE

SALEM, N. H.—The townspeople of Hampstead and Atkinson are elated over the prospect of an electric road through their villages. The line will be a continuation of the Manchester and Derry road and the proposed line will run largely through private land, making the route more direct.

An enthusiastic meeting was held in the shoe factory of W. A. Emerson's Sons, Hampstead, and the matter thoroughly discussed. The directors were chosen and the stock sold at \$100 a share par value. The matter will be presented to the railroad commissioners shortly. The carrying of freight over the road is also proposed.

The promoters are: Arthur M. Emerson, H. W. Wheeler, W. H. Annis, Herbert N. Sawyer, George Sawyer, George P. Dow, J. A. McNeil. The charter was obtained four years ago.

BATCHELDER WILL
ALLOWED TODAY

The will of John L. Batchelder of Brookline, allowed today in the Norfolk probate court at Dedham by Judge Flint, disposes of an estate valued at \$350,000. It is divided into 30 shares, 10 of which are to go to the wife, Augustus L. Batchelder.

The sons George L. and John L., Jr., are named as executors and give \$500,000 bonds each.

BIG DYE COMPANY
BOUGHT BY RIVAL

PROVIDENCE, R. I.—The United States Finishing Company has absorbed the Queen Dyeing Company of this city. The Queen Dyeing Company was incorporated in 1893 and has grown from a small beginning to one of the best-known manufacturing companies in the city.

The United States Finishing Company was organized in 1899 under the laws of New Jersey with a capital of \$3,000,000.

WHEELING STEEL
WORKS REOPENS

WHEELING, W. Va.—Work has been resumed at furnace B of the Riverside tube mill of the United States Steel Company. Within a week the entire mill, employing 2500 hands, will be in full operation. The plant has been idle since October, 1907.

EX-VALET IS SENTENCED.

LONDON—William Cox, a former valet in the employ of Alfred G. Vanderbilt, was sentenced to three months' imprisonment in the Marlborough street police court today for the theft of \$5000 worth of jewelry from Mr. Vanderbilt in his Park Lane residence after Cox had been discharged.

ORGANIZE GLOVE FACTORY.

PATERSON, N. J.—The Messenger Glove Company has been organized at Flemington, N. J. Its capital stock is \$25,000 and the purpose is to manufacture gloves and textile fabrics.

SHOE AND LEATHER
FAIR "OPEN HOUSE"

(Continued from Page One.)

leather men at the exposition this afternoon were Joseph Caunt, Charles E. Wilson, Frank McGowan, Thomas W. Gardner and E. H. Dunbar, all of Lynn; Frank Teel of Peabody, Mass.; F. V. Brown, A. E. Eilers, A. P. Chute, Maurice D. Hallett, A. B. Williams, Frank W. Wither, F. L. Young, James McPherson, W. F. Mosser, M. A. Packard, W. F. Goodnow, T. H. Jones and William McCloske, all of Boston; Hazen B. Goodrich of Haverhill; Charles K. Fox and R. E. Brennan of Randolph, Mass.; and Harvey Guppl of Haverhill, Mass.

The building is of concrete and fire-proof construction with two stories. The architects figured on the accommodation of 20,000 people, and consequently have given the building ample means for the exhibition of goods. The building measures 500 feet in length and is 200 feet wide. Hinting of the international scope of the exposition, five distinctive domes, representing America, Europe, Asia, Africa and Australia, grace the roof of the building and also aid in the carrying out of the Grecian style of architecture adopted.

The main dome is 125 feet in diameter, and its rotunda, designed after the famous Albert Hall in London, will comfortably hold 4000 people. Large sample and display halls radiate from this rotunda.

KUEHNEMANN TO SAY FAREWELL.

Prof. and Mrs. Eugen Kuehnemann will give a farewell reception to their friends in Phillips Brooks House this afternoon from 4 to 6 o'clock, for which personal invitations have been sent out. Professor Kuehnemann sails for Germany on June 5 and will not return next year.

NEW PROFESSOR AT BROWN.

PROVIDENCE, R. I.—Arthur Ware Locke, son of Warren Locke, director of chapel music at Harvard University, has been engaged as professor of music at Brown University. Mr. Locke is now in Berlin studying music.

GEORGIA EXPECTS
STRIKE PARLEY TO
SECURE PROGRESS

ATLANTA, Ga.—Though no apparent progress toward the settlement of the strike of firemen on the Georgia Central railway was made at the conference between General Manager Scott, Vice President Hall of the Brotherhood of Locomotive Firemen, and Charles P. Neill, United States commissioner of labor, there is a hopeful feeling today that the conference will bring satisfactory results.

Scott was also in conference with Governor Smith this morning, and the Governor is said to have made it plain that he expected the strike to be brought to a speedy termination.

The tie-up continues complete and the resulting inconvenience is great. Mayor Brand of Lithonia, a town on the Georgia Central, said today that if provisions ran short in his town he would order the seizure of several carloads of provisions stranded on a side track in Lithonia.

While there is no real danger of food scarcity in any of the towns along the road, the people are in no mood to submit to even slight deprivations, and a raid on the company's cars containing provisions will likely be made if the strike continues.

There was an outbreak at Augusta Tuesday night, when a mob of strike sympathizers attacked an engine on which were a strike-breaking fireman and an armed guard. The engine crew attempted to escape by driving the engine at top speed, but the engine was derailed. One of the guards, a man named Hewitt, fired into the crowd, but did not hit any one. He was seized by the crowd and would have been severely dealt with had not the sheriff and a number of special deputies arrived on the scene.

Hand cars, automobiles and interurban cars made little impression upon the 3000 pounds of delayed mails in the Atlanta postoffice. Here and there in the strike district a rural postmaster shouldered a sack of outgoing mail and after hours of hard work riding and walking managed to reach an unaffected railroad station.

The strikers have announced that they are willing to fire engines to carry mails, but that such engines must carry mails only and not passengers.

HARVARD CLASS TRIENNIAL.

The class of 1906 will celebrate its triennial during the coming class day exercises at Harvard. The class will attend the Yale game, the boat races and the Pop concerts in a body. Monday, June 28, they will go to Lowell as the guests of the Vesper Country Club. The next day they will have an outing at Cohasset.

SPRINGFIELD WANTS TAFT.

SPRINGFIELD, Mass.—Efforts are being made by the Independence day committee to have President Taft stop at Springfield July 5, and take part in the municipal celebration. The President is expected to pass through the city, en route from Norwich, Conn., to Ticonderoga, N. Y., where he is due to speak July 6.

LAST CALL!

The Summer Editions of the telephone directories of the Boston and East Central Divisions positively will close to the public on May 29.

If you wish to have your name appear—and you live anywhere between Cohasset, Mass., and York Beach, Me., including Boston and Portsmouth—you should send in your order AT ONCE.

Call or write our Local Manager. In the Boston District, Fort Hill 7600.

Peerless Rubber Mfg. Co., 16 Warren Street NEW YORK

SOMERVILLE BRANCH LIBRARY
WILL BE DEDICATED TONIGHT

Formal exercises dedicating the new \$25,000 Carnegie library of Somerville as the West Somerville Branch Library, will be held in the new building on College avenue this evening at 8 o'clock. Mayor John M. Woods will formally receive the keys to the building from Building Commissioner Walter T. Littlefield, who has supervised the erection of the structure. The mayor will then turn the keys over to Dr. Edwin C. Booth, chairman of the board of library trustees.

Addresses will be made by a representative of the firm of Wright & McLean, architects of the building, by Mayor Woods and by Dr. E. C. Booth, chairman of the board of library trustees. John F. Foster, through whose efforts the gift from Mr. Carnegie was secured, as the guest of honor will probably speak.

The formal dedicatory address will be made by Dr. Horace G. Wadlin, librarian of the Boston Public Library. This speech will be the last event on the program. A meeting of the Somerville library trustees was held Tuesday evening, and the foregoing program formally adopted.

The new library branch will be thrown open for public use on Thursday at 1 p. m. The building will thereafter be open for business every week day except from 1 p. m. to 9 p. m., and on Saturdays will be open from 9 a. m. to 9 p. m. Arrangements have been made whereby a person holding a library card issued by the main library may secure books from the branch, and vice versa. There will be a daily delivery of books from the main library and books will be procured from the Central Hill building on request.

WALTER T. LITTLEFIELD.
Commissioner of public buildings of
Somerville who was in charge of
the new library.

RAP STREET DELAY
IN WEST ROXBURY

West Roxbury citizens voiced their objections to the inactivity by the street department in laying out of Temple and Center streets in that section of the city at a mass meeting Tuesday night. The city charter bill was also discussed.

Representative Earl E. Davidson said: "It is up to the people of West Roxbury to see that they get what they want."

Representative J. Henry Leonard said that as long as the charter bill was for direct nomination he would vote for it, because he believed that what was good for the goose was good for the gander, and the same applied to towns and cities.

WINTHROP WOMEN
WIN PLAYGROUND

The Winthrop Woman's Club has won its fight to secure summer playgrounds for the school children in that town. For the past six months the members of the club, under the leadership of President Helen F. Gardner, have been agitating the matter with the school commissioners, but their efforts to secure a suitable lot of land for a playground have been fruitless.

After repeated hearings on the subject the board has finally consented to grant the club permission to locate the playground opposite the Winthrop High School building, but the expenses of an instructor will have to be defrayed privately.

SALVATION ARMY
TO INVADE CHINA

NEW YORK—Officers from the Salvation Army from every quarter of the United States attended the national congress of the organization which opened here Tuesday night.

Miss Eva Booth, the commander in this country, called the congress to order and introduced Colonel Higgins of London, who, as the representative of General Booth, announced that the Salvation Army had decided to try to convert China.

LUCIERS MOVING
FROM HOME CITY

WORCESTER, Mass. — Mr. and Mrs. Fred D. Lucier, 94 Belmont street, members of the celebrated Lucier family of musicians, which has helped to make Worcester famous, are moving from this city to Onset Bay.

The Luciers have just returned from a successful tour of 51 weeks in vaudeville the past season, during which time they appeared in the leading cities of the middle West, Northwest, West and southern part of the United States.

DENMARK HOLDS ELECTIONS.

COPENHAGEN—The elections for the Folkething were held Tuesday. The Ministerialists elected 38 adherents, M. Christensen's party 34, the parties of the Socialists and the Radicals, which opposed fortifications, 39, and 11 are doubtful. The ministers of finance, justice and commerce have been unseated. Premier Neergaard and the other ministers have been re-elected.

ALBERTA MINERS MAKE PEACE.

MACLEOD, Alberta.—The board of conciliation and arbitration has succeeded in bringing about a coal agreement and speedy resumption of work is assured. The miners yield on the open shop contention and operators yield as to discrimination.

CORNELL STUDENTS WIN.

ITHACA, N. Y.—Because of a protest by 2000 students, it has been decided by the trustees of Cornell not to adopt the recommendation made by the faculty, which would have brought about radical changes in the college year.

GORGAS IN NEW YORK.

NEW YORK—The steamship Panama, brought from the isthmus Col. W. C. Gorgas of the canal commission and Maj. James P. Jersey.

UNITARIANS TODAY
REELECT DR. ELIOT
AS THE PRESIDENT

The Rev. Samuel A. Eliot, D.D. of Cambridge was reelected president of the American Unitarian Association at the annual meeting of that organization this morning at Tremont Temple. About 1000 members of the association were in attendance.

Other officers were elected as follows: Vice-presidents, Charles W. Ames, St. Paul, Minn.; Horace Davis, San Francisco; Gov. Eben S. Draper, Hopdale, Mass.; the Hon. D. U. Fletcher, Jacksonville, Fla.; Wallace Hackett, Portsmouth, N. H., and Miss Emma C. Low, Brooklyn, N. Y.; secretary, the Rev. Lewis G. Wilson, Boston; assistant secretary, George W. Fox, Boston; treasurer, Francis H. Lincoln, Hingham; directors for New England, Percy A. Atherton, Boston; Clarence E. Carr, Andover, N. H.; George Hutchinson, West Newton, and Augustus P. Record, Springfield; director for the middle and southern states, Mrs. S. Margaret Loud, Montreal, Can.; director for the western states and Pacific coast, William P. Olds, Portland, Ore.; nominating committee for 1910, representing New England, Walter M. Hatch, Wollaston, and Abbott Peterson, Lancaster.

The opening prayer and scriptural selection were given by the Rev. Elmer Sawyer Forbes of Boston.

The Rev. William H. Carruth of Lawrence, Kan., offered the report and resolutions of the business committee for the past year. The resolution which referred to encouragement of attendance at the National Unitarian conference in Chicago during the coming September, and the recommendation relating to the establishment of a field ministry to carry the teachings of Unitarianism into parts of the country where no church of that denomination already existed were unanimously accepted. The amendment to the constitution on the admission of future life members of the association, upon the motion of George E. Ellis was held over for another year and the president was empowered to appoint a special committee of seven for further consideration of the matter.

The unfinished business of the morning session will be continued at 2:30 o'clock in the afternoon, followed by brief addresses by clerical delegates from different parts of the country.

Today's vesper service will be held at the First Church at the corner of Berkeley and Marlboro streets at 5 o'clock, the Rev. Caleb S. S. Dutton officiating.

At the public meeting this evening at 7:30 o'clock at Tremont Temple the anniversary sermon will be preached by the Rev. Julian C. Jaynes of West Newton. Special music will be provided by a male chorus under the leadership of Frank O. Nash.

The public meeting on Tuesday evening at Tremont Temple was largely attended, the hall being open to the public. Ex-Gov. Curtis Guild, Jr., presided and in his remarks referred to the fact that, while the followers of the Calvinistic churches of Switzerland were now erecting a monument to the memory of Servetus, whom the Unitarians claim as a pioneer of their faith, the Unitarians today are preparing to erect a memorial to Calvin at Geneva in recognition of the value of Calvin's life to the cause of free thought.

The Rev. Dr. Samuel M. Crothers of Cambridge spoke on "The Vital Element in Religion," and was followed by the Rev. Charles E. St. John and the Rev. Minot O. Simons.

CRUISER SALEM
TO REPEAT TESTS

NEWPORT, R. I.—Tests will be repeated here in an effort to better the trials which the scout cruiser Salem underwent in company with her sister scouts, the Chester and Birmingham, and which were not satisfactory to her builders, with the exception of the coal consumption test.

Following the completion of the overhauling at the yards of the Fore River Shipbuilding Company, the Salem will proceed to the naval coaling station at Bradford and take on there a supply of coal in preparation for a trip to the Cape Verde islands. It is planned to have the cruiser leave on June 5 for that place to meet the Chester and Birmingham, returning from Liberia.

Y. M. C. A. LIBRARY
WILL OPEN TODAY

PAWTUCKET, R. I.—The new library at the Y. M. C. A. to be known as the McGregor Library, which has been furnished by friends of the Rev. Alexander McGregor through the activities of the King's Daughters of the Pawtucket Congregational Church, will be thrown open to public inspection for the first time this afternoon and evening.

A large bronze tablet, which will be placed in the room, bears the inscription, "This room is furnished by the friends of the Rev. Alexander McGregor, pastor of the Pawtucket Congregational Church, 1883-1898." Alexander McGregor of Boston, son of the Rev. Mr. McGregor, has forwarded a striking portrait of his father, which will be conspicuously placed in the room.

FIRE PROTECTION DISCUSSED.

NEW YORK—Fire underwriters, electrical engineers and others interested in fireproof construction are assembled here today hearing various reports pertaining to fire protection. It is the thirteenth annual convention of the National Fire Protection Association. The meeting will be continued today and Thursday.

The One Who
Knows, Wins

Ready and accurate knowledge is the key to success. It is the well-informed clerk who gets promotion; it is the well-informed business man who knows best where to apply energy and capital to produce the largest results; it is the well-informed woman who shines in her social circle.

To succeed you must know—but most people are too busy to read a roomful of books. That's why the New Century Reference Library should be within your reach every day. It gives in eight compact volumes all the information that is usually stored in a whole library of reference books.

The New Century Reference Library
8 Volumes

The set consists of eight handsome, well-bound octavo volumes—the most convenient size for general use. The volumes are profusely illustrated with color plates and black and white illustrations. Among the illustrations there are 136 subjects illustrated by colored plates, 125 by monochrome plates and 45 by colored charts, while hundreds of subjects are depicted by the cuts in the text.

Encyclopedia: In the encyclopedic portion of the Library, covering every branch of human knowledge from the hieroglyphs of Egypt to the twentieth century aeroplane. This section includes a Biographical Dictionary, containing 9000 sketches of notable historical characters.

Pronouncing Dictionary: In this section 40,000 words are defined and their pronunciation given. This includes all the words in the English language that do not properly belong to a dictionary of technical terms.

Topical Index: This convenient index is valuable to students. There are 2000 questions, each question being accompanied by a reference to an article in the Library. The Question Manual is a development of the modern card-index system of classifying knowledge.

Sent on
Approval

Cut out and mail the coupon. Send no money with your order. The sets will be shipped to you, express prepaid, for ten days' examination. If you find it satisfactory, send us \$2.00 as first payment, and \$2.00 a month until the special price is paid. Or, if you prefer to pay cash in full, after examining the books, you may deduct 10 per cent from the price. If you do not care to keep the Library, after examination, notify us, and we will give you directions for disposition of the books.

National Press Association
12 and 14 West 32d Street,
New York

SPECIAL OFFER TO JULY 1ST.

The regular list price of this work are \$3.00 for cloth binding and \$36.00 for half-leather binding. But until July 1st a special low price to Christian Science Monitor readers is made. Cloth binding \$16.00; half-leather \$20.00—payable in 10 installments of \$2.00 a month, or 10% discount for cash.

Gazetteer and Atlas: The Atlas contains maps, covering every state in the Union and every country in the world. There are 25,000 references to places in the Gazetteer, and location being given in each case.

Chronological History: The History is given in an unique series of colored charts, showing the epochs into which the record of mankind falls. Every important historical event from 5000 B. C. to the present time will be found here.

Question Manual: This feature of the Library is valuable to students. There are 2000 questions, each question being accompanied by a reference to an article in the Library. The Question Manual is a development of the modern card-index system of classifying knowledge.

NATIONAL PRESS ASSOCIATION,
12 and 14 West 32d St., New York.

Send me, express prepaid, a set of the New Century Reference Library in half-leather binding on approval. If satisfactory, I agree to pay \$2.00 in ten days, and \$2.00 a month until \$20.00 is paid. If not satisfactory, I agree to return the books in ten days.

Name.....

Street.....

City.....

We recommend the half-leather binding, but if the cloth binding is desired, change \$20.00 to \$16.00.

PASTOR PLEADS
FOR SOCIALISM

Worcester Man at the New Hampshire Episcopal Convocation Urges a Tolerant Hearing of Its Views.

MANCHESTER, N. H.—A convocation of the Episcopal diocese of New Hampshire opened at Grace Church Tuesday night. An address on "The Relation of Socialism to Christianity" was made by the Rev. Eliot White of Worcester.

"So much confusion exists as to what socialism is and aims to accomplish," said the speaker, "that it will greatly aid to state a definition put forth by the socialist party in this country and endorsed by all of its members: 'Socialism is the modern movement of the working class to abolish private ownership in the means of production and distribution and to substitute for it a system of industry collectively owned and democratically administered for the benefit of the whole people.'"

"I do not presume that socialism is right, but I claim that it has relation to Christianity at least to the extent that it deserves an honest, thorough and sympathetic investigation by every Christian who loves the truth and who believes that we must know the whole truth before we can fully enter into that majestic promise of our Master that it shall make us free."

NAVAL ACADEMY'S
HONOR STUDENTS

ANNAPOLIS, Md.—The class standing of the third section of 1907, which graduated in three sections because of the need of junior officers in the navy, has been given out by the naval academy. The 10 leaders of the class are:

Richard S. Galloway, Washington; Nelson C. Hinkamp, Milwaukee; Edgar A. Ewing, Chicago; Michael J. Trolingski, Nanticoke, Pa.; Riley F. McConnell, Gate City, Pa.; Joseph Warren Jewell, Manchester, N. H.; Ralph R. Stewart, Huron, S. D.; Robert L. Montgomery, Council Bluffs, Mont.; Charles E. Hovey, Portsmouth, N. H.; George Joerns, Duluth, Minn.

FARM BULLETINS
TO BE CONTINUED

The Massachusetts state board of agriculture is preparing to continue the work of issuing monthly bulletins on crop conditions the coming season. Already the 225 correspondents of the board have been notified to make monthly reports, and data for the May report is now coming in.

OPEN BIDS FOR
CITY BUILDING

NEW YORK—New bids have just been opened by Bridge Commissioner Stevenson for the construction of the foundations of the municipal building to be erected just north of the Park row entrance of the Brooklyn bridge.

THE MISSISSIPPI
MAKES FAST TRIP

The Great Battleship Travels From Natchez to New Orleans in Fourteen Hours, a Remarkable Feat.

NEW ORLEANS—The battleship Mississippi reached the navy yards at 7 p. m. Tuesday, several hours ahead of her schedule and having broken all records for speed on the Father of Waters.

The boat left Natchez at 5 a. m., and the trip of 297 miles was made in the remarkably short time of 14 hours. The trip down the river was marked by as much enthusiasm as was exhibited on the upward journey.

TREMOR OF EARTH
IN ILLINOIS TODAY

CHICAGO—A slight earthquake shock lasting about one second shook several parts of Illinois shortly before 9 o'clock this morning. No damage is reported. At Pontiac and Freeport the quake was rather violent. Windows were rattled and articles shaken from the walls.

MILWAUKEE, Wis.—Cities all over southern Wisconsin are reporting an earthquake at 8:34 o'clock this morning.

PEORIA, Ill.—A slight earthquake shook this city at 8:30 this morning. Director Deeley of the local weather bureau station said the shock was of three or four seconds duration. No damage resulted. Reports from Wyoming, Edwards Station and other central Illinois towns are to the effect that an earthquake shock was felt at the same time the disturbance was noted in Peoria.

QUINCY MANSION
SCHOOL PROGRAM

QUINCY, Mass.—Commencement week will begin at the Quincy Mansion School, Sunday, June 6, when the baccalaureate sermon will be delivered by the Rev. A. Z. Conrad, D. D., of Boston.

On Monday the school concert will be held, and on Tuesday at 3 p. m. the class day exercises will take place. A meeting of Quincy Alumnae Association will be held at 11 a. m. and the graduating exercises will be held at 2:15 p. m.

CHINESE MARKET
FARMERS THRIVE

WOBURN, Mass.—The Chinese farmers at Walnut Hill are having a successful season. Their first crop of cabbage is already well under way and will soon be ready for market. They usually get three crops yearly from the property.

The Chinese raise a peculiar kind of cabbage which is unfamiliar in this country, but which finds a good sale.

YOUNG DIPLOMAT TO WED.

NEW YORK—Seth Low Pierpont of Ridgefield, Conn., third assistant secretary of the American embassy at Paris, and Miss Natalie Elizabeth Channey of New York, have obtained a marriage license.

CONGREGATIONAL
CHURCHES MEET

Report Is Read at Fifty-Seventh Annual Meeting of Worcester Central Conference Held at Princeton.

PRINCETON, Mass.—The fifty-seventh annual meeting of the Worcester central conference of Congregational churches was held with the Princeton Congregational Church. There were 101 accredited delegates present.

The conference was called to order by Moderator William Woodward, Worcester. After the singing of a hymn, prayer was offered by Deacon H. H. Merriam, Worcester, after which an address of welcome was given by the Rev. Charles E. Reeves, pastor of the Princeton Congregational Church.

Preceding the report of the Rev. Thomas E. Babb, scribe, these committees were appointed: Resolutions, Dr. Edward Payson Drew, L. C. Muzzy and the Rev. Peter McMillan, Worcester; nomination, Dr. Andrew Burns Chalmers, Dr. G. A. Newton, Worcester; the Rev. Thomas A. Babb, Holden; credentials, Dana M. Dutton, Henry Brannon, Worcester.

THOUSANDS VISIT
AERIAL CARNIVAL

NEW YORK—Twenty thousand persons attended the opening of the aerial carnival at Arlington, N. J., on Tuesday. Captain Baldwin did not make his contemplated tour through the air to Manhattan, as the conditions were not favorable. He returned to the grounds after making a start.

ELECT PROFESSOR CAPEN.

WORCESTER, Mass.—The annual meeting of the Public Education Association was held Tuesday night, these officers being elected: President, Prof. S. P. Capen; vice-president, G. I. Alden and F. B. Williams; secretary, Mrs. J. H. Robinson; assistant secretary, Robert K. Shaw; treasurer, James Green.

THE HOUSEKEEPER

Hints That May Help.

A LINGERIE BLOUSE.

Bordered materials and flouncings are so many and attractive this season that the blouse which is especially adapted to them is certain of welcome. This one can be made as illustrated, with chemise and under portions of the sleeves of tucking or other contrasting material, or it can be made from plain material, with the straight edges embroidered to suit the fancy. The free edges of fronts and backs are straight, and consequently adapted to almost any material. They are arranged over the chemise and the blouse is closed invisibly at the back. If plain material is used the sleeves can be made as shown in the back view to match the chemise, or they can be made to match the waist portions, as preferred, but just as illustrated the blouse is a singularly attractive as well as practical one.

Material required for the medium size is 5 1/2 yards of flouncing 15 inches wide, with 1 1/4 yards of tucking 18 to make as shown in the front view; 2 1/4 yards of flouncing, with 2 1/4 yards of tucking, to make as shown in the back view; 2 1/2 yards 24 inches wide, 1 1/2 yards 32, or 1 1/2 yards 44 inches wide, with 3/4 yard of tucking, to make from plain material. The pattern (6336) may be had in sizes from 32 to 42 inches bust measure. Address as under No. 6336.

SOME PRACTICAL RECIPES.

FISH CREAMED IN A POTATO BORDER. Cook together 2 tablespoons butter, 1 teaspoon onion juice, 1 teaspoon parsley and 2 tablespoons of flour. Add 1 cup hot milk or fish stock, season with salt, cayenne and 1 tablespoon of lemon juice, and add 2 cups of cold cooked fish. When hot, stir in quickly a well-beaten egg yolk and a half cup of hot cream. Serve at once. For the border use 1 quart of mashed and seasoned potato mixed with the beaten yolks of 2 eggs. Shape on a platter as desired, brush over with the beaten white of an egg and brown slightly in the oven.

EGGS EN COQUILLE. Take out the soft inside of 6 small French rolls, leaving a shell large enough to hold an egg. Brush over with soft butter and brown slightly in the oven, or fry light brown in hot fat, or simply toast them if you prefer. Beat 6 eggs slightly, add half a cup of cream, season with salt, pepper and 2 tablespoons of grated cheese, fill the shells and bake until the mixture is firm. Or, mix 6 hard-boiled eggs chopped fine with 1 cup thick cream sauce, fill the shells, sprinkle with a little grated cheese and brown in the oven. Or, arrange the shells on a platter covered with rich poultry gravy or cream sauce to which a few chopped mushrooms have been added, put a raw egg in each and bake until the eggs are set.

POTATO CHOWDER. Peel 6 potatoes and slice about one eighth of an inch thick. Soak them in cold water half an hour, parboil 5 minutes and drain. Fry 6 slices of bacon with 2 small onions sliced thin, until the onions are brown, being careful that they do not burn. Take out the bacon, add the potatoes, sprinkle with salt, pepper and chopped parsley, add a pint of hot water and boil until the potatoes are done. Then add a quart of hot milk, thicken with a tablespoon of butter and one of flour cooked together and serve very hot with toasted crackers.

IN THE SHOPS OF ADVERTISERS.

For a compact, commodious and artistically constructed office desk the shopper should visit the store of W. B. Badger & Co. and examine the merits of their new leg desk which is meeting with much favorable notice.

Write to Sol. Bloom, 366 Fifth avenue, for a catalogue of all the latest records for the Victor machines. This establishment is headquarters for the Victor records and mail orders are given prompt attention.

W. H. McLellan whose place of business is at Haymarket square, carries a large and excellent stock of tents, shades, hammocks and all the latest designs in awnings. Before providing the home with these summer furnishings call and inspect this fine line of goods.

Local readers of The Monitor should remember that the alterations at the Haymarket square subway station have now been completed and that passengers can transfer between elevated trains at the Union-Friend tunnel station and surface cars of the Boston Elevated Railway Company at this point.

Some sweeping reduction prices in high grade tailored suits are announced at Small's, the popular New England cloak store at 523 Washington street. The sale is now in progress and the shopper who wishes a genuine bargain will not be disappointed if she includes this place in her list of visits. Among the many attractions of this sale are suits in serge and pongee which were formerly \$20 and \$30 now offered for \$9.75.

The housekeeper surely will want to consider early in the summer the comforts and economy offered by the Magee range, with the gas combinations. This combination provides two stoves in one and at the price of one. The space occupied by it takes up no more room than a single range.

The use of the raincoat is by no means confined to the days when the weather conditions are inclement. It is

A GIRL'S DRESS.

Such a simple little dress as this finds a great many uses. It can be made from embroidered batiste, as in this instance, and trimmed with embroidery and lace banding and become adapted to occasions of dress, or it can be made from some simple dimity or lawn and become available for simpler occasions. It consists of blouse and skirt joined by a belt with the trimming portion at the front arranged over them, which gives the long princess lines. Either short or long sleeves can be used, and if the square Dutch neck is not becoming the dress can be made high with the regulation stock.

Material required for 12-year size is 6 1/2 yards 24, 4 1/2 yards 32 or 3 1/2 yards 44 inches wide, with 6 yards of embroidered banding, 1 1/2 yards of lace insertion and 4 1/2 yards of edging to trim as illustrated.

The pattern (6338) may be had in sizes for girls of 8 to 14 years of age at any May Manton agency or will be mailed on receipt of price (10c.). Address 132 West Twenty-seventh street, New York, or Masonic Temple, Chicago.

a most serviceable garment for use in travel, or in boating and automobilizing. The Macular Parker Company are showing their customers a most satisfactory line of these coats in the latest designs and in prices ranging from \$20 to \$35.

The housekeeper who wishes a conservative institution in which to place her bank deposit will appreciate all the advantages of modern banking service combined with a full assurance of safety if she opens an account with the Old Colony Trust Company.

A special paint for use on piazza chairs and other outdoor furniture is prepared by the Carpenter-Morton Company of 77 Sudbury street. This paint is made from hard drying outside varnish combined with pure colors. The result of the use of this paint is a brilliant gloss surface.

The June number of Everybody's Magazine has made its appearance and contains much interesting matter. Fredrick Upham Adams contributes "The Trick of the Wall Street Game" in this number which will be read with interest by those closely identified with the financial world.

At Bailey's rubber store at 22 Boylston street, the shopper will find a large variety of makintoshes, rain coats, silk rubber coats and all clothing for outing occasions. In fact everything in the line of rubber goods is carried by this well-known firm.

Murch & Loomis are offering their patrons a genuine Gloucester hammock complete with mattress for \$5.50. It is just the article needed for the living room of the bungalow or for the furnishing of a piazza. The headquarters of this firm are at 43 Bowker street.

Many dainty silver novelties suitable for birthday souvenirs or wedding gifts will be found at the jewelry shop of J. C. Sawyer at 10 Summer street. This firm will buy duplicate gifts, no matter where the articles were purchased.

An article which will be much appreciated by the home sewer will be found in the stitch ripper, which will pick up and pull out bastings, machine stitching, as well as draw threads for hemstitching most easily and quickly. If interested in this device call on Mrs. S. E. DeMerritt of 170 Portland street.

McFadden, the ladies' hatter of 167 Tremont street, is conducting a mid-season sale of millinery. Some charming imported models which were originally marked as high as \$40 are now being sold at \$10 and \$15.

The housewife who wishes to make a variety of delicious desserts should invest in some packages of Slade's tapioca. It may be found at all the leading grocery stores.

LONG-LOST SISTER SURVIVED WRECK

ST. JOHN, N. B.—Through a chain of developments which followed the making of repairs at this port to the steamer Calvin Austin, John Norton of this city, it is stated, has just learned that a sister supposed to have been on the steamer Atlantic in 1873, when the vessel was wrecked at Prospect, N. S., survived that event, and is now the wife of Harry Barton of Boston, a fireman on the Boston ocean tug Orion.

The Bartons formerly lived in East Boston, but Mrs. Barton and the children recently went to Brownfield, Me., for the summer.

MAHOGANY CLAIM TO BE ARBITRATED

WASHINGTON—A protocol for submission to arbitration of the Emery claim has just been signed with representatives of the Nicaraguan government.

The claim, which has been long pending, arose out of the annulment by Nicaragua of a concession granted to the big mahogany concern now in New York, but formerly of Chelsea, Mass., for cutting of mahogany, because of an alleged violation of its provisions.

Million Dollar Hotel and Splendid New Theater for St. Paul, Minn., Which Boasts of Some of the Largest Enterprises in the Country

(Photo copyright, 1904, by F. L. Wright.)
BIRD'S-EYE VIEW OF MINNESOTA STATE CAPITOL AT ST. PAUL.

ST. PAUL, Minn.—A million dollar hotel is among the notable new enterprises in this city, and adjoining the hotel site the Shuberts are to build a \$250,000 theater, seating 1200 to 1400 people, while the ground has been broken

for a Young Women's Christian Association home on which \$300,000 will be expended.

St. Paul boasts that it has the largest market in the country for manufactured fur garments; is the center of

wholesale trade for saddlery and harness; has more boot and shoe factories than any other state but two, and they are located in the east, and has the largest house manufacturing twine, matting, rugs and furniture of every descrip-

tion from the coarse and wiry swamp grass.

The city proper is about five miles wide north and south by ten miles east and west, has a fine location, and good climate.

In the Lighter Vein

THE REASON.

"Why does Darby call his tenements 'The Dollar Apartments'?" They rent for more than that, don't they?"
"Oh, yes, but you go there on corn beef and cabbage day and you will find out. It is the house of a hundred scents."

NEVER INTRODUCED.

Young man—When you first started in business did you meet with success?
Merchant—I did not. I hustled like everything to catch up with success. The success that you "meet with" generally gets past before you can grab her.

A GOOD SIGN.

Window trimmer—How will I mark these cradles?
Proprietor—Red rock prices.

A SIGN OF TROUBLE.

The philanthropist opened a low-priced lodging house in the crowded part of the city. He made everything as homelike as possible and put a neat white enamel sign on the door at the bottom of the stairs reading: "Rooms 10 cents. Baths free."

To his surprise one day a patron appeared, the most disreputable looking tramp imaginable.
"What's the matter with all of the boys?" the proprietor asked. "My place is clean and the price is low."
"It ain't de place an' it ain't de price, boss, dat's queerin' you. It's de sign. Gimme a night's lodgin' an' I'll fix it fer you."
"It's a bargain," said the puzzled proprietor. And the next morning he read the added words, "But not compulsory."

LIONIZED, EITHER WAY.

After the strenuousness of his farewell, how restful it would seem to Mr. Roosevelt to clamber up a friendly tree a few steps ahead of a snarling lion and murmur, "Thank goodness, it is not a reporter."

VAN-GUARD OF CITY TREASURY.

In Chicago they are using a furniture van for tax-collecting purposes. It is a moving sight.

SERIOUSLY, THIS WAS FUNNY.

Scrivener wrote to his editor as follows: "I do not believe that you are paying

HADLEY AWARDED PRIZE FOR MUSIC

Thousand-Dollar Guerdon for Setting of Poem by National Federation of Clubs Goes to Massachusetts Man.

GRAND RAPIDS, Mich.—The prize winners in the competition of the National Federation of Musical Clubs have been announced. Henry K. Hadley of Massachusetts is winner of the \$1000 orchestra prize for the best musical setting of "The Culprit Fay." The \$500 prize for piano composition and the \$500 prize for song composition were both awarded to Arthur Shepherd of Newton Center, Mass.

Henry K. Hadley, born and bred in Somerville, is one of the most prominent younger musicians and composers in the country. He is the son of S. Henry Hadley, for many years musical director in the schools of Somerville. After studying in Boston he went, in 1894, to Vienna. The following year his first sonata, "Youth and Life," was brought out, and a ballet suite produced in this country. Since that time he has produced in all more than 150 songs and piano pieces, besides a large amount of chamber music.

In 1902 he won the Paderewski prize the first time with his symphony, "The Four Seasons," which also gained the New England Conservatory prize. Three years before he had won a \$250 prize offered by the Musical Record, with a cantata, "In Music's Praise." In 1895 he was appointed instructor in music at St. Paul's School, Garden City, L. I. For the past few years he has spent almost his whole time in Europe, conducting orchestras at Mainz, Berlin and elsewhere, returning home to America only in the late spring and summer.

me enough. George Ade is making \$50,000 a year, Mr. Dooley gets a big salary and Mark Twain commands his own price. I believe that my work combines characteristics of all three. Yours truly."

To his surprise the letter was printed in his column and he received a telegram from the editor reading:

"Ade-Dooley-Twain letter best thing you have sent for months. It made the proofreader laugh."

NEW LAMPS FOR OLD.

"When all of the jokes are written And all of the stories are told, What shall we do?" sighed Pessimist As tears from his eyelids rolled.

"What shall we do?" grinned Optimist. "Just what we've done before. We'll change them around a little bit And grind them out once more."

JUST GET THE STOPS RIGHT.

Achievement depends on getting into action promptly. "Beat it" and "Be at it" are both spelled the same.

BITS FROM OTHER WITS.

Simkins—Are you partial to the late songs of the day?

Timkins—I probably should be if the girl next door didn't transform them into the late songs of the night.—Georgia Free Lance.

"Every time the baby looks into my face he smiles," said Mr. Meekton.
"Well," answered his wife, "it may not be exactly polite, but it shows he has a sense of humor."—Washington Star.

Ikey—Vat is a promoter?
Father of Ike—A promoter is one who will supply der ocean if some von else will furnish der ships.—Princeton Tiger.

His Friend (admirably)—Where did you get your wonderful knowledge on social and economic subjects?

The Admired (proudly)—From my daughter's graduation essay.—Judge.

Bilkins—I'd hate to work in a watch factory.

Filkins—Why? That ought to be an easy job.

Bilkins—No, too much working over time for me.—Bean Pot.

BOSTON'S SAVINGS INTEREST STEADY

Officials Say There Is No Prospect of Changing the Four-and-a-Half Per Cent Rate Now Paid by Some.

Officials of several well-known Boston savings banks which now pay 4 per cent on deposits, discussing a New York report, said that a reduction to 3 1/2 per cent had not been considered seriously in this city. They could not say definitely what might be done in six months' or a year's time, as the rate of interest was a subject to be governed entirely by the general trend of business prosperity, but felt confident that the present rate would now remain unchanged.

Savings banks of New York have decided to pay interest to depositors on July 1 at the rate of 4 per cent, in spite of the agitation which in the last few months has grown acute in favor of reducing the rate to 3 1/2 per cent. There will be no exception to the rule. Practically all the savings banks in the city have decided to pay at the rate of 4 per cent, although no formal action has yet been taken.

If the savings bank rate has been reduced to 3 1/2 per cent it would have meant a loss to the depositors in this city of close to \$5,000,000 for the half year. Altogether there are about 1,770,000 savings bank accounts in this city, so the loss would have been widespread. The total amount of interest paid on the \$550,000,000 of deposits in local savings banks amounts to \$35,000,000 a year.

It is possible there will be no necessity to reduce savings bank interest on Jan. 1 next, which is the first date after July 1 when payments will be made, because by that time money may rise enough to make the bonds much cheaper.

In the Library Alcove

THE home of Sir Walter Scott at Abbotsford attracts many American tourists in Scotland. "In its library," writes Norma Bright Carson, in the Book News Monthly, "one senses the kindly, hospitable spirit of the Abbotsford laird, the geniality, the courteous grace of one who welcomes friends to partake of his home joys. From a niche in the wall the gently humorous eyes of the poet and story teller smile in greeting to the visitor; the books bear witness to the wealth of history and legend that went to make up that noble array of romancing art in the concrete form of a long line of novels."

Mapes Dodge. He began his literary career at the age of 13 by launching a monthly paper, called the Cricket.

Miss Ellen Glasgow, author of "The Romance of a Plain Man," has gone to London to remain for some time.

Will N. Harben has left New York for the summer and has gone to the South. He plans to spend some time in Charleston before going on to his old home in Dalton, Ga.

Anne Warner, whose book "The Rejuvenation of Aunt Mary," has been so popular both as a story and on the stage, began her literary career in 1901, and has since had nine books published, including three dealing with the experiences of "Susan Clegg." Her home was in St. Paul, Minn., until she took up her residence in Germany, where her little daughter is being educated. She is a most prolific writer of short stories.

Gladner Teall, in the Bookman, calls attention to a distinct revival in wood-engraving, which he says deserves good encouragement.

Ferris Greenslet, author of the "Life of Thomas Bailey Aldrich," and literary adviser of the Houghton Mifflin Company, has returned from making brief visits to Rome and London.

Hamlin Garland has been a visitor in New York from Chicago. Shortly after his return to the latter city Mr. Garland expects to go to his summer home in Wisconsin.

An admirer of Irving writes to the New York Times: "I purchased some time ago a copy of Irving's 'Sketch Book,' printed by C. S. Van Winkle. I find Nos. 1 and 2 are dated 1822, while the other numbers are dated 1820. It part of this first edition?" The Times replies: "There are seven numbers to 'The Sketch Book,' Nos. 1, 2, 3, 4, and 5 were issued in

The Rev. W. Elsworth Lawson, author of "Euphrosyne and Her Golden Book," has lately left his charge in Mexico City, where he has lived for the last eleven years to go to the Pilgrim Congregational Church in Oakland, Cal., where he hopes to find more time for his literary work.

Writing of a visit to Hugo's house in the Place des Vosges, Paris, in the Outlook, Edward Verrall Lucas says: "I have been to Carlyle's house in Cheyne Row, to Johnson's house at Litchfield, to Wordsworth's house at Grasmere, to Milton's house at Chalfont St. Giles, to Leighton house at Kensington; and the impression left by all is that their owners lived very thin lives. The rooms convey a sense of bareness. But Hugo—Hugo's house throbs with life and energy and warm, prosperous amities. Every inch is crowded with mementos of his vigor and his triumphs. Here are portraits of him by the hundred, at all ages, caricatures, lampoons, playbills, first editions, popular editions, furniture by Hugo, decorations by Hugo, drawings by Hugo, scenes in Hugo's life in exile, wreaths, busts—Hugo, Hugo, everywhere, always tremendous and splendid and passionate and French."

From Paris comes the interesting announcement that the authorities at the Bibliotheque Nationale are actively engaged in collecting all the "pieces judiciaires" of famous cases such as that of the Diamond Necklace, which has figured so prominently in works of fiction and alleged historical novels, as well as in genuine histories. When the work of collection is completed the material will be embodied in a catalogue, expected to extend to seven volumes, which will be compiled under the direction of M. Marchal, the keeper of the printed book department.

Frank Danby, author of "The Heart of a Child" and of a new novel soon to be published, dislikes to be interviewed. One journalist recently waylaid him with the question: "When do you do your writing?" To which Mrs. Frankau replied: "When I cannot get a fourth for bridge."

Victor Mapes, the author of "Partners Three," is a nephew of the late Mary

COMPLETE CONTROL OF PANAMA CANAL IS AMERICAN PLAN

Strategic Importance of Big Ditch Is Such That the United States Could Not Afford Neutrality.

NO NEED FOR HASTE

WASHINGTON—The Panama canal, once it is completed, will be wholly the property of the United States. The guns of American battleships and powerful batteries ashore will defend its integrity, and so far as this government's present intentions go no foreign nation will be asked to assist in the maintenance of the big ditch, and no overtures will be made to the powers to agree to a general treaty making the canal a neutral waterway.

This much is learned at the state department. It is declared that nothing is contemplated in the way of asking the various nations to join in an agreement guaranteeing the neutrality of the waterway, as was the case with the operation of the Suez canal. The war department is continuing work on the plans for the fortifications.

So far as the officials of the state department are able to predict, other nations will not be approached on the question of the operation of the canal. Of course it will be open to commerce, but in case of war the United States could not afford to let an enemy's fleet pass through from the Pacific to the Atlantic coast or from the Atlantic to the western side. If universal neutrality were agreed to this country would either have to permit this or else break faith with the other signatories.

Although the cost of the fortifications and the great guns that are to be mounted in them for the protection of the canal will run into the millions of dollars, the war department does not believe that Congress will withhold the necessary appropriations when the time arrives to begin the work. This belief is based on the fact that the United States then will have spent a vast sum on the construction of the canal, and the refusal to provide adequate protection would be so short-sighted a policy that neither party would have the temerity to adopt it.

It is probable that a board of military experts will be sent to the canal zone to study the ground before anything final is done. The report of this board will accompany the war department's estimates when the matter is presented to Congress.

1819, and Nos. 6 and 7 in 1820. Our correspondent therefore has first editions of Nos. 6 and 7 only. These two numbers have fetched \$1.75 at auctions.

We are soon to have a new novel by John Ayscough, who wrote "Marotz." The new story is "Dromina," and deals with the famous Dauphin of France, son of Louis XVI. and Marie Antoinette.

Forrest Halsey, author of the society novel, "Fate and the Butterfly," has two dramas in the field—"The Cat's Paw" and "The Higher Law."

69 SUMMER ST.

ITALY'S QUAKE FUNDS, GIVEN BY THE WORLD, NEARLY GONE

LONDON—Practically all of the \$28,000,000 Italian earthquake relief fund contributed from all over the world is disbursed or promised, according to the Rome representative of the Daily Mail today.

The despatch also states that the principal ruined cities have not even begun the reorganization of normal conditions.

The president of the central relief committee has furnished the following figures, which, however, are only approximate. The relief sent by foreign countries to the Italian Red Cross was valued at \$4,700,000, of which the cash subscriptions were approximately as follows: Great Britain \$800,000, Argentina \$400,000, Germany \$400,000, France \$300,000 and the United States \$300,000. The relief from other countries has not

been calculated precisely. The foregoing sums do not include provisions from abroad, but and warship relief, of which the United States gave about \$1,000,000 worth. The Italian government voted \$8,000,000 and imposed surtaxes equivalent to \$14,000,000, the latter being distributed over a series of years and to be expended in restoring public services in the earthquake area.

In addition to these amounts the Vatican received \$2,160,000 from the Catholics of the world, much of which has already been distributed by the Sicilian and Calabrian clergy. This is a total charity of \$28,000,000. The central committee disbursed \$4,450,000 and engaged very large sums for rearing orphans and other charities, which must continue for years, and now has at its disposal only \$16,375.

NOTED MERCHANT TO BE SPEAKER AT BIG TRADE DINNER

A banquet of the retail business men of Boston is to be held at the Hotel Somerset June 7, and the largest gathering of the kind ever held in New England is expected. Not only the members of firms and corporations, but managers, superintendents and heads of departments in all classes of retail trade are to attend.

The Boston Merchants Association committee, which is making arrangements, is preparing a large invitation list, and the official announcements will be sent out within a few days.

One of the principal speakers will be Robert C. Ogden, a prominent merchant of New York. Mr. Ogden is an authority upon organization and detail in retail establishments. He recently spoke at the Harvard Union on "Retail Business as a Career for College Graduates." He is familiar with business conditions in Boston, as he spends every summer on the north shore, and has taken much interest in local affairs.

He is perhaps best known for the educational work he has done in the South. He started the movement there for a local tax for purposes of education, and has been active in building up institutions which have become famous.

A short time ago he brought a large number of school superintendents from the southern states to the North and conducted them through various cities where they might see the operation of the school systems. This was done at his own expense, as have been many other attempts to improve conditions in the South.

He is president of the Southern Education Board and a trustee of the Tuskegee Institute and of Hampton Institute, as well as of the General Educational Board. He retired from the firm of John Wanamaker in 1907, after 22 years of service there, but is still active in many public affairs. He is taking a large part in the organization of the "committee of one hundred" for improving the methods of government in New York. He is the author of numerous booklets, some of them on religious subjects, and has been a frequent contributor to magazines. He holds a degree of master of arts from Yale University and of doctor of laws from Tulane University.

The committee on retail trade that is in charge of the arrangements for this dinner, which is the first of a series, is one of the largest and most representative committees now at work in the Merchants Association. It includes members from the crockery, dry goods, sporting goods, furniture, musical, fur, lighting fixtures, department stores, men's furnishings, specialty shops, shoe and other trades.

The committee has been at work but a short time and has given its first attention to the establishment of a better and closer relationship between the retail men of the city in order that they may deal intelligently and unanimously with the problems directly affecting their business interests.

CONEY ARRESTS TO BE NUMEROUS

NEW YORK—The police, before the end of the week, will arrest 400 persons charged with violating the Sunday closing law at Coney Island. As fast as they are arrested they will be taken to court and held in bail for trial. There will be no more raids. The police will get evidence and then go into court for warrants.

Mayor McClellan and Police Commissioner Bingham want the vexatious Sunday closing matter settled once and for all, and the only way to do it, they realize, is to bring all alleged offenders into court that the latter may pass on every phase of Sunday observance.

The Coney Island men say they prefer the new plan to the old game of making raids and dragging a lot of people into court next day. They say that they much prefer to have the courts rather than the police pass on alleged violations of the law.

LAWRENCE MILL BUYS HOUSE LOTS

LAWRENCE, Mass.—Loring park, a large tract of land in South Lawrence, has been sold by ex-Mayor John P. Kane to the American Woolen Company. It is understood that the site will be occupied by tenement houses for future employees of the Ayer mill, now in course of erection.

BOSTON UNIVERSITY GRADUATES TONIGHT OPEN FESTIVE WEEK

Commencement week at Boston University begins tonight with a dance of the senior class to be held in Horticultural Hall. About 300 guests of the class are expected to attend. Among the patronesses of the affair are:

Mrs. E. Charlton Black of Cambridge, wife of Professor Black of the English department of the college of liberal arts; Mrs. Charles Evans of Somerville, Mrs. W. N. Avery of Boston, Mrs. Lyman C. Newell, wife of Professor Newell of the department of chemistry, Mrs. Edward Green and Mrs. Edward Morse.

Friday evening the college faculty will give a farewell reception to the senior class at the Hotel Vendome at 8 o'clock.

Saturday morning at 10 o'clock the Phi Beta Kappa, the intercollegiate honorary society, will hold its first meeting in the college building. The newly elected candidates will be announced, these being from the present graduating class.

For Sunday afternoon President William E. Huntington delivers the baccalaureate sermon to the members of the graduating class in Jacob Sleeper Hall.

An original senior play will be performed in Jacob Sleeper Hall on Monday night and the same evening the senior class of the Boston University medical school will observe class day.

On Tuesday the trustees gather in semi-annual meeting and vote upon the question of degrees. In the afternoon the college of liberal arts and the graduating class of the law school will hold exercises. The second meeting of the Phi Beta Kappa Society will be held at 5 p. m. in the college building.

In the evening a number of reunions and banquets will be held. Among these will be the Alpha chapter, the Gamma chapter, the Epsilon chapter, each of which includes the graduates from some one of the departments. At 8:30 o'clock Prof. Borden P. Brown of the department of philosophy will address the Epsilon chapter.

The commencement program proper occurs on Wednesday morning at 10:30 o'clock in Tremont Temple. The address will be delivered this year by Prof. Bliss Perry, followed by the promotion of candidates for degrees.

Later in the day the university convocation which includes the graduates from all departments, will meet in Jacob Sleeper hall. The Rev. Edgar J. Helms, Dr. Edward P. Colby and the Rev. Arthur Pratt will address the meeting.

The senior reception, which will take place on Wednesday evening from 8 to 11 o'clock in the college building will conclude commencement week.

UNCHANGED WAGE IN NEW BEDFORD

NEW BEDFORD, Mass.—The cloth mill operatives of this city, through the textile council, have asked for a restoration of the wage scale which prevailed early in 1907, and the manufacturers have refused to make the restoration.

Two years ago wages were reduced in the cloth mills of the city 10 per cent, and at the conference at that time it was understood that when business improved the schedule then paid would be restored.

SPRINGFIELD MAN OFFERED N. Y. POST

NEW YORK—The Rev. Dr. Charles L. Slattery, rector of Christ Church, Springfield, Mass., has been selected to fill the chair of history at the General Theological Seminary, a Protestant Episcopal institution of this city.

He was chosen by the trustees Tuesday noon, and it is understood he has accepted. Dr. Slattery is a native of Pittsburg and was graduated from the Episcopal Theological Seminary at Cambridge in 1894.

LYNN ALDERMEN AID EMPLOYEES

LYNN, Mass.—The Lynn aldermen Tuesday night voted to give policemen one day off in 15, and to give firemen one day off in eight, and also to increase the salary of lieutenants of the fire department \$50 a year, making the salary of that office \$1050. It was also voted to instruct the park commissioners to consider the advisability of establishing a menagerie in Lynn woods for the benefit of the school children.

Conveying Massive Granite Block Out to Sea Wall

UNITED STATES BREAKWATER AT SANDY BAY, NEAR ROCKPORT, MASS. Picture illustrates section of great bulwark being erected off coast of Cape Ann to make safe harbor for ships.

HARBOR OF REFUGE WORK, COSTING FIVE MILLIONS, RENEWED

Contractors Start This Week on the Sandy Bay Breakwater, Two Miles Off Cape Ann.

ROCKPORT, Mass.—Work has been resumed this week after several months' suspension, on the Sandy bay breakwater which is being built two miles off Cape Ann just to the north of this port, and which is destined when complete to make Sandy bay the greatest and most valuable harbor of refuge on the entire Atlantic seaboard. It is hoped that within the next few months it will be possible to erect 300 feet of the superstructure, which will complete the 400 feet called for under the existing contract and use up all of the present available appropriation of \$200,000.

The contractor, to whom the United States government through the engineers of the Boston district, Lieut. Col. Edwin Burr in charge, awarded the work for the present contract and for the greater portion of that already completed, is the Rockport & Pigeon Cove Granite Company with quarries at Rockport and Pigeon Cove within two miles of the breakwater. In turn these companies sublet the contract for setting the stones for the superstructure to Roy H. Beedy of Fall River and Mr. Beedy with his engineers and divers, and the massive barge Pocasset are now at Pigeon Cove awaiting favorable conditions to put out to the breakwater and commence operations for the season.

Because of the exposed location off the coast of Cape Ann, which is one of the roughest places along the north Atlantic coast, it will be possible to work this summer only under the most favorable conditions, as the work will have to be done from two huge barges and with the aid of a traveling crane, and stones of from 10 to 40 tons weight will be handled.

The superstructure of the breakwater when complete will be 9000 feet long, while the substructure will be slightly longer. The superstructure will be commenced 12 feet below the mean low water

LOCATION OF BREAKWATER AT SANDY BAY. Map shows relative size of enclosed water and the nearby points.

mark and will be continued to 12 feet above mean high water mark, and divers will be used entirely in the work of laying the lower stones of the construction.

When complete the superstructure will extend from Avery's Ledge on the northeast to Straitsmouth island in a general southeasterly direction, having two arms and entirely enclosing the waters of Sandy bay, giving a sheltered harbor of 1664 acres with water from 30 to 80 feet in depth, sufficient to accommodate the largest merchant marine or naval vessels afloat and sufficiently large to give shelter to more than 5000 vessels and yet leave plenty of room for any of them getting under way.

This great work which has been declared to be of national importance was commenced after careful surveys by the government in November 1885 and at that time it was estimated the cost of the work when complete would be a little more than \$5,000,000.

Statistics for the past 10 years show that more than 70,000 vessels pass Sandy bay annually, and all of the shipping between Boston and the Maine coast sails close to Cape Ann.

Principal among the several arguments for the speedy completion of the harbor is that vessels could easily reach the bay from any direction. The harbor will have two openings, one at the north and another at the south, so that on any wind it would be easy to make the openings in one of which the water is at its lowest 30 feet deep and at the other 80 feet deep, the southern opening being 1800 feet wide while the northern opening will be 2700 feet wide. This is a

feature that does not exist in any other harbor on the Atlantic coast.

There are no bars or obstructions or any difficult channels to be traversed in coming into this harbor, and it is shown that the holding ground as found at the bottom by the United States surveys is the very best.

Sandy bay is situated at the northeastern extremity of the promontory of Cape Ann, which forms the northern limit of Massachusetts bay. The rocky island of Straitsmouth forms the eastern extremity of one shore line, and the steep headland of Andrews Point the northern end of the other. Following the line of the proposed breakwater, the bay is two and three-fourths miles wide, and it has a depth of two miles approximately. The bay on the land side is perfectly protected by steep, high hills, but it fronts the northeast and is open to the full force of northerly and easterly gales of this coast. The great seas of the ocean are broken, however, in a degree by the sunken rocky ledges called Avery's Ledge, the Dry and Little Salvages, the Fat Grounds, and Abner's Ledge, which are directly at the mouth of the bay. Inside of these entrance ledges the bay is entirely unobstructed, and has an average depth of 50 feet at mean low water.

FACTORY TO BEGIN WORCESTER WORK

WORCESTER, Mass.—Work will begin by June 1 in the R. L. Morgan Company motor truck factory here, to which a charter was granted Tuesday under the laws of the state of Massachusetts. Practically the entire stock is held by Worcester men. Fifty to 60 men will be employed in manufacturing, aside from an office force of about 12.

The building is three stories high, 150 by 50 feet, with an ell, giving an assembly room of 350 by 50 feet. It is owned by Crompton Associates and was formerly occupied by the Crompton-Thayer loom works. The R. L. Morgan Company holds a long-time lease on the property. The officers of the company are: President, Ralph L. Morgan; treasurer and general manager, Henry E. Whitcomb; vice-president, F. B. Durfee, and secretary, Alfred R. Grundle. John R. Back will have charge of the production end of the business. The company is capitalized for \$300,000.

OPERA ENGAGES RUSSIAN SINGER

The Boston Opera Company today announced that it has received a cablegram from Director Henry Russell announcing that Lydia Lipkowska, the famous Russian lyric soprano, has been engaged by the Boston Opera Company and the Metropolitan Opera Company jointly for next season, and that her debut in this country will be made in this city early in November.

SCRANTON FLYER WRECKED

ALLENTOWN, Pa.—The Scranton flyer on the Central Railroad of New Jersey was wrecked Tuesday night, 15 miles west of here. Six cars left the track. None was injured.

PROTESTS PAYING RETIRING OFFICER

LOWELL, Mass.—The aldermen have postponed action on Mayor Brown's request that this city rescind its action whereby the legislative act relating to pensioning police officers on half pay was accepted here.

The special meeting followed the retirement of Superintendent Moffatt on half pay at the end of the hearing on charges against the board of police, in which Superintendent Moffatt's record was attacked. The aldermen referred the matter of the legality of the superintendent's pension to the city solicitor.

Mayor Brown announced after the aldermanic meeting Tuesday night that while he is mayor he will not sign any payroll which would permit Superintendent Moffatt to draw his half pay.

SCHOOL MATRON GETS BIG BEQUEST

CARLISLE, Pa.—Mrs. Mary Leas, matron at the Conway Hall Preparatory School, has received word that by the will of Silas Leas, a milling machine manufacturer of Rock Island, Ill., she and her five daughters will receive a share of the estate, amounting to a sum between \$250,000 and \$500,000.

Silas Leas was a brother of her late husband, George W. Leas. His estate is said to be worth over \$3,000,000. The bequest was unexpected.

PRESIDENT NOMINATES TWO

WASHINGTON—The President today sent the following nominations to the Senate: To be director of the census, Edward Dana Durand of California; to be chief of the bureau of navigation, Rear Admiral William P. Potter.

INVENTOR DISCOVERS A WAY OF PHOTOGRAPHING SOUNDS

CLEVELAND—Prof. Dayton C. Miller of the Case School in this city announces that he has discovered a means of photographing sound.

By the use of his newly perfected device he believes it will be possible to distinguish on films the difference between the tones of a human voice and the tones of a musical instrument.

The nearest that experimenters have come to reproducing sound waves heretofore has been to make them visible on smoked paper. Several photographs have been made on regular print paper, but they have been small and imperfect.

The invention of Professor Miller directly photographs the sound waves, magnifying them 2000 times and recording them on films.

In his investigation Professor Miller has used a harmonic analyzer, an instrument made in Switzerland, which separates sound waves into their component parts, determining whether a certain photographed sound wave was made by a flute, a bell, a violin, or other musical instrument.

It is his purpose to tabulate the results of his experiments for the use of other investigators, a labor that will require several years.

RAZING JUDGE ADAMS HOUSE, OLDEST BUILDING IN QUINCY

QUINCY, Mass.—The historic Judge Adams House on Elm street, built in 1641 for Joseph Ruggles, and which has been visited by President John Quincy Adams, today is being cut in halves and partly torn down.

The central section was, originally, a separate house by itself, and in fact, it was the first house erected on the spot. The front part and the back kitchen were each separate buildings, and were joined to the central part as families grew larger and required more room. So, in reality, the entire structure contained three separate and distinct houses, and it

is the first and oldest of these that is now being done away with.

It is a matter of history that is known to but very few people in this city that the portion of the house being torn down is the oldest structure in Quincy, according to members of the Adams family who once occupied the place, and also verified by Warren S. Parker, city inspector of buildings.

The old hand-hewn timbers and hand-wrought nails and oak pegs used in the construction of the building can be plainly seen, as the big timbers are being carefully preserved by Edward Menhinick, the present occupant of the place, who is tearing out the old part in order to save the other sections.

MERCHANTS PLAN TO BOOM WOBURN

Committee Works to Arouse Interest for Betterment of Trade and General Civic Conditions.

WOBURN, Mass.—Active work for civic betterment is under way in this city. A committee of five business men is working today to arouse interest among the business men in a movement which looks to the betterment of trade conditions and a general advance movement for every phase of life in the city.

The committee is advocating a Wednesday half-holiday for business houses during June, July, August and September. The good results gained by business men's associations in other cities has stirred a few of the more aggressive men here to hope to accomplish something.

The committee, which will report at the next meeting, includes Messrs. J. D. Haggerty, Samuel Higley, J. F. McGrath, J. F. Deland and Leon Dorr.

NEW QUERY NOW FOR CITIZENSHIP

NEW YORK—Judge Lacombe asked 50 candidates for citizenship in the United States circuit court whether they were members of any labor organization or other society which does not allow its members to join either the regular army or the national guard.

The question was introduced, it is said, on account of recently reported agitation in certain labor organizations against membership in militia companies. The applicants denied belonging to any such organization.

COMPANY OFFERS BOON TO BEVERLY

United Shoe Machinery Firm Gives Practise Shop and Instructor for Industrial School Movement.

BEVERLY, Mass.—The United Shoe Machinery Company has offered to fit up a practise shop at its factory, to install an instructor, to furnish the material at cost and to buy the finished product at agreed prices. If this plan is adopted the city will furnish the theoretical training at the high school building, where special quarters will be assigned.

The cost to the city for the day school is estimated at \$1800 of which \$1300 will be for the instruction at the high school. At the evening school the cost is estimated at \$1000 of which \$800 is for salaries. The plans will allow for two classes of 25 boys.

The state commission on industrial commission is very favorably impressed with the Beverly plan. A hearing will be given on the proposition by the Beverly city council at city hall Friday evening.

CONCORD HONORS U. S. ENVOY MOSES

CONCORD, N. H.—George H. Moses, the minister to Greece, and Mrs. Moses were given a reception by the Woonsocket Club on Tuesday evening. A general invitation had been issued to the public by Gen. F. S. Streeter, president of the club. The attendance was large. Mr. and Mrs. Moses will sail from Boston for Europe on Saturday on the Cymric.

Studebaker Automobiles

THE final test of the value of an automobile is the verdict of its owners. Mr. John F. O'Rourke, the man who built the Pennsylvania Tunnel, owns a STUDEBAKER car. We quote in part from a recent letter:

"My STUDEBAKER has been in constant service throughout the past year. I have never yet stopped on the road for any mechanical trouble, and have repeatedly passed higher powered and higher priced foreign cars.

"Your Make-and-Break ignition system is absolutely unequalled. The STUDEBAKER spring suspension and riding qualities surpass any automobile I ever rode in."

No man is better qualified to pass on the real worth of an automobile than is Mr. O'Rourke. You cannot make a mistake if you follow the advice of such a well known engineer and experienced motorist.

PROMPT DELIVERIES

News From the Capital

SENATE ROLL-CALLS
REVEAL LINE-UP OF
TARIFF PARTIZANS

Final Vote as Strict Party
Balloting Will Not Disclose
Real Opinions of the Indi-
viduals on Aldrich Bill.

STRENGTH IS SHOWN

WASHINGTON—As the tariff law reaches its final stages it will be interesting to the country to know by what votes the Aldrich bill is passed. The so-called final vote on the bill will not disclose this. That vote will be a strict party vote. The Republicans will practically all vote in favor of the bill, while the Democrats will vote against it. The actual line-up in the Senate—which is a non-partisan one—is that which develops from day to day when an effort is made to amend particular schedules. A number of roll-calls have been taken at the insistence of Senators Cummins, Beveridge and La Follette. These roll-calls have developed the strength upon which Senator Aldrich relies in forcing the passage of the tariff act substantially in its present form. From these roll-calls what might be called a composite roll-call has been prepared. This roll-call affords an interesting subject of study.

Following are the senators supporting the Aldrich tariff measure:
Aldrich, Bradley, Brandegee, Briggs, Bulkeley, Burnham, Burrows, Burton, Carter, Crane, Cullom, Curtis, Depew, Dick, Dillingham, Dixon, Du Pont, Elkins, Flint, Frye, Gallinger, Gamble, Guggenheim, Hale, Heyburn, Jones, Kean, Lodge, McCumber, McHenry, Nixon, Oliver, Page, Penrose, Perkins, Pyles, Richardson, Root, Scott, Smith of Michigan, Smith of Maryland, Smoot, Stephenson, Sutherland, Warner, Warren, Wetmore.

The states represented by the above names comprise Rhode Island, Kentucky, Connecticut, New Jersey, New Hampshire, Michigan, Ohio, Montana, Massachusetts, Illinois, Kansas, New York, Vermont, Delaware, West Virginia, California, Maine, South Dakota, Colorado, Idaho, Washington, Louisiana, Nevada, Pennsylvania, Maryland, Utah, Wisconsin, Missouri, Wyoming.

In a few of the states the senators are divided. For instance, Borah of Idaho does not go with Heyburn; Newlands does not go with Nixon in Nevada, nor does La Follette go with Stephenson in Wisconsin; Warner and Stone take opposite sides in Missouri. Geographically these states are seen to represent the manufacturing interests of New England, the lumber and furniture industries of Michigan, the iron working, wool and electric industries in Ohio (Burton and Dick), the wool of Montana, coal, iron ore and glass in West Virginia, lumber and citrus fruit in California, the smelting industries in Colorado, lumber and wool in Idaho, lumber in the state of Washington, sugar in Louisiana, wool and lumber in Utah, lumber in Wisconsin.

Among those found voting against the Aldrich bill are the following Republicans and Democrats:

Bacon, Bailey, Bankhead, Beveridge, Borah, Bristow, Brown, Burkett, Chamberlain, Clapp, Clark of Arkansas, Clark of Wyoming, Clay, Crawford, Culberson, Cummins, Daniel, Dooliver, Fletcher, Foster, Frazier, Gore, Hughes, Johnston, La Follette, McLaughlin, Martin, Money, Nelson, Newlands, Owen, Overman, Paynter, Rayner, Simmons, Smith of North Carolina, Stone, Talliaferro, Taylor and Tillman.

In the above list the unusual votes are those of the so-called insurgent Republicans, such as Beveridge, Borah, Bristow, Brown, Burkett, Chamberlain, Clapp, Crawford, Cummins, Dooliver, La Follette, Nelson. These votes place in opposition to the Aldrich tariff the sentiment of such states as Indiana, Idaho, Kansas, Nebraska, South Dakota, Minnesota, North Dakota, Iowa, Wisconsin—all Republican states.

Many of the Democrats go on record against the tariff as a matter of form, but a few of them have shown their willingness to come into line and vote for the Aldrich bill on certain schedules. Daniel of Virginia is willing to vote for a duty on lumber, Hughes of Colorado will vote for anything in the line of the interest of the smelting industries. Johnston of Alabama wants a duty on iron ore and Bailey of Texas voted that way also. Bailey will also vote for a duty on hides. McLaughlin will vote for a duty on sugar. Smith of Maryland votes for a duty on lumber, while Tillman will vote for a duty on tea. La Follette has voted in favor of all amendments revising the tariff downward and will vote against the bill as a whole, probably. Cummins has voted in favor of all downward amendments, but has stated that he will vote for the bill on final passage.

TAFT TO SUPPORT
CUSTOMS PROBE

WASHINGTON—Collector Loeb has the approval of President Taft in his campaign to reorganize the New York customs service. Mr. Loeb spent a short time with the chief executive Tuesday. The President is declared to have said that he was in complete sympathy with all that had been done, and that the administration wanted the inquiry to go to the bottom of the conditions that had existed at the most important port in the country.

THROUGH RATES
FROM PORTLAND
ARE SUSTAINED

Railroads Required by Order
of the Interstate Commerce
Commission to Establish
Joint Rates From East.

PORTLAND GATEWAY

WASHINGTON—A decision has been handed down by the interstate commerce commission in what has come to be known as the "Portland gateway case," in which the contention of the traveling public for through rates and joint rates from Eastern points via Portland, Ore., is sustained. The roads which were defendants in the proceedings are required by order of the commission to establish before July 1, 1909, through rates and joint rates via Portland and to maintain them for at least two years. Chairman Knapp and Commissioner Clark dissented from the majority opinion of the commission, maintaining that satisfactory through rates and joint rates already are in existence.

By the terms of the decision, which is highly important to the traveling public and to the western and northwestern railroads, the Northern Pacific, the Union Pacific lines and the Chicago Northwest-ern railway are ordered to join in the sale of through passenger tickets between Seattle and other points in the Pacific Northwest and eastern destinations, via Portland, Ore., and to accord through facilities, like the checking of baggage, over this route.

The case was instituted on the initiative of the commission itself, in view of the numerous complaints it had received that the present through rates were unsatisfactory. It has been pending many months and was bitterly contested by the railroads. The law empowers the commission to establish a through route and joint rate in cases like the present, provided no satisfactory through route already exists.

The Northern Pacific insisted that it already affords a satisfactory through route to points on its line north of Portland, and hence that the commission had no jurisdiction to open the Portland gateway, even though, as a matter of discretion it might be of opinion that this ought to be done.

The commission holds that the right of a railroad to control its traffic by the making of arrangements for through routes and joint rates for the hauling of both passenger and freight business is a thing of value to the railway, which should be protected in so far as it can be without infringing upon the right of the public, but that these railroads are public servants and it is their first duty to accord to the public proper facilities.

HOPE TO LIGHTEN
SHIPP'S PENALTY

Dissenting Opinions of Su-
preme Court Cheer Friends
of Tennessee Sheriff, Ad-
judged in Contempt.

WASHINGTON—Marshal Wright will bear the duty of bringing before the supreme court next Tuesday Sheriff Shipp and the other Chattanooga men who were pronounced guilty of contempt because of their supposed participation in the lynching in 1905 of a negro prisoner, after the supreme court had taken cognizance of the case.

The men are at liberty on bonds on their personal recognizance, but it is not apprehended there will be difficulty in obtaining custody of them.

It is believed the dissenting opinion of Justices Peckham, White and McKenna will have an appreciable effect in ameliorating the punishment.

CHATTANOOGA, Tenn.—The decision of the supreme court in the contempt case of ex-Sheriff J. F. Shipp has surprised this city. He declares he is innocent of any infraction of the law and had confidently anticipated an acquittal.

MR. TAFT DEFINES
FREE WORK DAYS

WASHINGTON—President Taft has issued an executive order providing that all government offices, arsenals and navy yards and land stations shall be closed on Monday following the Sundays that fall on the dates of public holidays, and that all persons employed in these various government bureaus who would be excused from work on the holidays shall follow a holiday on the Monday following, except in such case where state laws fix other days for the occasion.

In these cases the government offices shall be closed and the employees given a holiday on the day designated by the state laws.

LYNN MAN INVITES TAFT.

WASHINGTON—Senator Lodge has introduced to the President at the White House James E. Odlin of Lynn, who invited the President to deliver an address in that city some time this summer.

President Taft Is Lauded
For Originating Tariff
Revision by Beveridge

WASHINGTON—Lauding President Taft as the broadest, most conservative exponent of the Republican party, Senator Beveridge addressed the Senate for a revision of the tariff downward, along protective lines. He declared that President Taft originated the sentiment for a tariff revision two or three years ago.

Mr. Taft's speech at Bath, Me., Senator Beveridge said, was the first expression of the necessity for tariff revision, and "fate turned the calcium light of future greatness upon him then." Taking quotations from Mr. Taft's speeches during the campaign and at its close, Mr. Beveridge declared that President Taft had promised a readjustment by revision downward.

The President's speech on the occasion of his notification Mr. Beveridge lauded as "the wisest, most conservative and best expression in all the history of tariff revision."

Washington Briefs

Brigadier-General Allen, chief signal officer, has left Washington for a visit of inspection of the signal corps property at Ft. Omaha, the signal school at Ft. Leavenworth. He will return to Washington in time for the flying machine tests at Ft. Myer.

An official statement of wages in Germany now lodged in the state department will be sent to the Senate, in accordance with a resolution introduced by Mr. La Follette.

Ambassador Jusserand of France has left Washington for San Francisco to present to the city on behalf of the French government a gold medal commemorative of the restoration of the city from the earthquake and fire of three years ago.

ENGLISH INQUIRY
SCORES U. S. BEEF

Embassy Secretary Reports
That "Trust" Keeps Price
Reasonable, but That the
Quality Is Inferior.

WASHINGTON—An investigation of convictions in this country in connection with the alleged "beef trust" has caused the British embassy to forward to the government of Great Britain a report that the operations of the trust result in England getting an inferior quality of beef. The report was prepared by George Young, second secretary of the embassy and a member of the Victorian order.

Rumors that the beef trust controlled the prices and the quality of meat products impelled the British government some months ago to instruct the embassy here to investigate the situation thoroughly and to report findings.

Mr. Young reports that the "trust" keeps prices at a reasonable figure, but that it sends an inferior kind of beef to the country which is the most famous consumer of beef in the world. He devotes particular attention to a company which is now under investigation by the department of justice, through District Attorney Sims.

CUBAN GUN BUYING
MAY TURN TARIFF

WASHINGTON—The recent contract made by the Cuban government for the purchase of 15,000 rifles in Germany and a large number of coast defense and field guns in France, has caused considerable comment here. Certain American firms went after the business but failed to get it.

Persons here interested in Cuba think such action on the part of the Cuban government may cause the American Congress, or at least some members of it, to voice objection to reciprocity with Cuba on tariff concessions in favor of Cuban sugar or tobacco.

LASTERS AT LYNN
TO MEET TONIGHT

LYNN, Mass.—The lasters of the Lynn shoe factories will meet this evening to choose a conference committee which will subsequently discuss further action with similar committees from all parts of the state regarding the formation of a national body of independent leather workers.

What the policy of the proposed national union will be is more or less a matter of conjecture. It is understood that no stamp contract will be entertained, but it is possible that contracts for definite periods may be sanctioned, in addition to provisions for settling disputes by arbitration.

SHERMAN-CANNON
PARTY ON OUTING

HARPER'S FERRY, W. Va.—A party including Vice-President Sherman, Speaker Cannon, the members of the inaugural committee, government officials and a delegation from the Gridiron Club is on an outing here. The party will leave Harper's Ferry at 4:15 this afternoon and reach Washington about 6 o'clock.

PLAYHOUSE NEWS

THE LAMBS' GAMBOLE.

"I love my pork and beans, but oh, you Lamb!"

That was the greeting Boston gave to the Lambs' Club when it reached the Hub Tuesday night to turn our city into a one-night stand for their all-star gambling. Over 3000 Bostonians added a total of over \$10,000 to the fund for a new clubhouse to see the show at the Boston Theater, and these, together with 6000 others, lined up along Boylston street, to see the visitors parade.

Marching to the spirited music of Victor Herbert's band the Lambs left the Back Bay station shortly after 7:30, when their special train pulled in in two sections from Hartford, the scene of the afternoon performance. The Lambs wore Commemorative coats and brown pot hats, and were applauded all along the route.

At 9 o'clock the curtain rose on the first part of the entertainment, an old time minstrel show with DeWolf Hopper as interloper and Macklyn Arbuckle, George Evans, Raymond Hitchcock, Ignacio Martinetti, Andrew Mack, Eddie Foy, Nat Wills and Clayton White as the end men.

Mr. Hopper performed with all the traditional dignity of his position and the end men were of course extremely comical. The songs were "Sweet Genevieve," sung by George Leon Moore; "Down Where the Watermelon Grows," by Eddie Foy; "Her Bright Smile Haunts Me Still," by William Stewart; "Alexander Jones," by Nat Wills; a triple sextet, "O That We Two Were Maying," and "Crisis in the Lawn," "Then You'll Remember Me," George Hamlin; "Mr. Brown," Charles Evans; "Annie Laurie," Eugene Cowles and "Go 'Way, Mistah Moon," Andrew Mack.

The concluding number was a grand chorus by the entire company, "I Want to Be a Good Lamb," which was a rousing number, as was the opening, the "grand medley overture."

While the stage was being prepared for the forum scene from "Julius Caesar," Augustus Thomas offered a souvenir program autographed by all the players. It was bid in by B. F. Keith for \$300. The forum scene was played "straight." The veteran James O'Neill was the Brutus, and DeWolf Hopper delivered Antony's famous oration impressively to the applause of the most expensive mob that ever listened to those stirring words. The scene was splendidly done. The mob was drilled by David Belasco, and every member of it was alive.

Then followed Nat Wills (substituted for the Weber-Felds sketch) in a monologue that made the house rock with laughter. The humor was mainly based upon the experiences of a young man with an extremely plump sweetheart named Hortense. Next came "After the Matinee," with Donald Ogden as the man and John C. Slavin, Paul W. Evans, A. Baldwin Sloane, Thomas W. Ross, Jack Deveraux, Scott Welsh, Wallace Edginger and Hassard Short as the girls. They were made up well and costumed prettily, and the whole performance was really graceful and a huge success.

The last number on the program was George V. Hobart's "Tuesday" in which the entire company appeared. It told the story of the "morning after" the opening of a melodrama "by Clay M. Greene" that had fallen flat. Joseph Grismer was conducting the rehearsal, and he stood out in the aisle trying to whip the play into shape while the actors and everybody else connected with the theater talked back, and heaped abuse upon

the author, Mr. Greene. The property man, Eddie Foy, had trouble in collecting 16 cents for "props." He was directed to the author. Mr. Greene said mournfully that if he had 16 cents he would never write another play. Digby Bell was the wardrobe mistress with many troubles, and Clayton White was the stage carpenter.

Donald Brian was the heroine, and made a "charming" girl; Wilton Lackaye was the hero, Dustin Farnum the villain, Neal McMay the mother, Eugene Cowles the father, Macklyn Arbuckle the uncle, William Farnum the brother, Charles Hopper the vaudeville, Raymond Hitchcock the chorus girl, Joseph Airon the gallery light-man. Wolf Hopper a visitor, John Slavin the call boy, Cyril Scott the juvenile, Robert H. Burnside assistant stage manager, A. L. Erlanger the manager, Ignacio Martinetti the coryphoe, Jan Collyer the stage door keeper and Andrew Mack the ballet master.

To strengthen the piece, advice was asked of Augustus Thomas, Charles Klein, Edwin Milton Royle, George Broadhurst, Eugene Presbrey and David Belasco. Each author insisted on putting in the big scene of his best known play, but in each case the big scene went wrong in a most amusing fashion. The peculiarities of each author's work were made fun of unmercifully.

Every idea offered was scornfully rejected until finally William Burress, made up as Oscar Hammerstein (the only character of the evening not played by "himself"), declared that the only way to make a success of the piece was to turn it into a grand opera. This was done, and the curtain fell at 12:05 a. m. upon a splendid operatic finale, with all the sonorous Lambs in full song and Victor Herbert's music in thunderous swing.

The affair was a great success in every way. The only unpleasant incident was the hissing by a small section of malcontents because Mr. Thomas announced the omission of the Weber-Felds pool table act. Mr. Ficus was detained, in New York on business. Mr. Thomas was rather staggered by the sounds of disapproval, but he soon was reassured by the handclapping of the major portion of the audience. We extend Boston's apology to the Lambs for this example of bad taste and cheap discourtesy, and feel sure that it was recognized by them as misrepresentative of the sentiments of the audience.

This afternoon the Lambs gambol in Brooklyn, and tonight in Philadelphia. Thursday afternoon, Washington; Thursday night, Baltimore; Friday afternoon, Cleveland; Friday night, Pittsburgh; Saturday afternoon and evening, Chicago.

NEW GOLD STRIKE
OUT IN CALIFORNIA

GRASS VALLEY, Cal.—The Allegheny mining district in Sierra county is the scene of enormous gold findings. Two Germans in the Morning Glory mine took out \$75,000 in ore in a few hours, and they have much more of the same valuable ore in sight. In the El Dorado mine, near the Lightner mine, on Kanaka creek, a blast brought out \$60,000 gold.

The ore is richer than a recent strike in the Sixteen to One mine. H. L. Johnson, the owner of the Lightner, which produced over \$1,000,000 last year, has an option on the El Dorado and is working it. The property was offered for sale two weeks ago for \$25,000. The Sixteen to One mine has produced over \$250,000 in the last three months.

REAL ESTATE NEWS

Through the office of Freeman & Lawrence, Kilby street, the property numbered 518 Commonwealth avenue, near Kenmore street and Brookline avenue, has been sold to Lewis P. Kaufman. There is a four-story brick house and 3128 square feet of land, the whole taxed on \$35,000.

The realty at 79 Prince street in the North End has been purchased by the Edison Electric Illuminating Company. The site is near Salem street and the assessment on the land and four-story brick structure thereon is \$15,800.

CENTRAL PARK, REVERE.

Atwood & Pattee, Niles Building, report that final papers have just passed, conveying eight lots of land at Central Park, Revere, to recent purchasers.

Lots 88 and 89 on Library street, containing 4205 square feet each, lot 90 on the corner of Library and Elm streets, containing 3800 square feet, lots 91 and 92, located on Elm street, containing 3800 square feet each, have been conveyed to Julia Dunbar of Lynn. These lots are assessed on a basis of five cents a foot, and the consideration paid was considerably in excess of the assessed valuation. Lots 95 and 96, on Sewall street, containing 3800 square feet, have been conveyed to H. Arthur Hall of Beaumont, who intends to improve them in the near future.

Lot 108, on Sewall street, containing 4435 square feet, has been conveyed to Thomas Brown of Lynn. This lot is assessed for 14 cents a foot. Mr. Brown also owns lot 111, adjoining lot 108, fronting on Winthrop avenue, and intends to erect two two-family houses, the plans of which have been completed and are in the hands of builders.

Lots in Central Park are fast being disposed of by this firm and it is expected that within the next month the erection of several houses will be started.

NEW HOTEL FOR LYNN.

Lynn is soon to have another hotel added to its already large number of hostleries. It will be a four-story one

and is to be erected on Oxford street, near the New England Telephone & Telegraph Company's central station, at a cost of about \$30,000. Stores will occupy the ground floor. In style the building will be Italian renaissance and constructed of red face brick with light sandstone trimmings and cut stone entrance. It will be ready for occupancy in September.

The property of the Hadley Cement Company at the corner of Michigan avenue and Huron street, Lynn, including both real and personal, has been sold at auction for \$4000. Several Boston men were among the bidders. The property went to Fred M. Page of Fred M. Page & Co., manufacturers of shoe findings, at 74 Brookline street, Lynn, who expects to continue the business. Last year's assessment on the property was in the neighborhood of \$11,000. There are 22,000 square feet of land in the estate.

BELLE VISTA SOLD.

One of the finest villas in the town of Hull has been sold through the office of D. Bradley Rich & Co. for G. B. Lewis. This is a large summer cottage on Point Allerton Hill known as the Bella Vista, which was erected a few years ago by Mrs. Alice Maddock of New York at a cost of \$30,000. The estate is situated on three streets and with the 50,000 square feet of land is assessed for \$12,250. The price paid by the purchaser, F. A. Kidder, was much in excess of the assessed valuation. The property commands a fine view out to sea, across the channel to Boston light and the North Shore and westerly over the islands and forts toward Boston.

Expect Electric Device
To Blow Whistle, Ring Bell,
Record Order, Stop Trains

THE Lacroix device is based on the closed circuit principle of electrical construction. In the engine cab is a register dial on which the device records in red ink the trouble ahead, the distance away and at the same time automatically blows whistles from a siren connected with the mechanism. Even if the engineer is not attending to business, or is so busily engaged otherwise that he is not looking at the dial the siren shrieks will call his attention. In fact, the attention of the engineer is not necessary where the device power is electricity, for the device instantly short circuits the electrical current and the train comes to a standstill within its length.

Domestic Briefs

Postmaster-General Hitchcock, who left Washington a few days ago for Havana, was scheduled to reach New York city today.

ALBANY, N. Y.—Governor Hughes has vetoed a bill permitting state moneys deposited in banks to be secured by municipal or corporate bonds.

SPOKANE, Wash.—The complaint against J. Herbert Anderson, president of the Idaho Smelting & Refining Company of Ponderay, Idaho, has been dismissed by the court.

COLUMBUS, O.—The Brotherhood of Railway Trainmen has passed resolutions calling upon the President and Congress to pass laws that will exclude from the United States illiterate and other undesirable classes.

HOLLAND'S BABY
HEIR IS SALUTED

Sergeant of Grenadiers at
Attention as the Infant
Crown Princess Juliana
Slumbers Peacefully.

THE HAGUE—While on guard at the gate leading from the palace garden into Molenstraat, a sergeant of grenadiers Tuesday morning observed the approach of a white perambulator pushed by a nurse. For five seconds he gazed at the approaching vehicle; then, suddenly realizing that it was the little Princess Juliana taking her first airing, he came to rigid attention and presented arms, although the princess slumbered on unconscious of the honor.

In the afternoon the sergeant was told by his colonel to repair to the palace in full uniform, as the Prince Consort desired to speak to him. The Prince told him that he had seen the salute from the window. He had noticed the soldier's moment of hesitation and subsequent salute, and so presented him with a bank-note to provide himself with a souvenir of the first salute to Her Royal Highness Princess Juliana.

NEW HAVEN CLAIM
REACHES MILLIONS

NEW HAVEN, Conn.—It is said authoritatively that investigations by auditors of the New York, New Haven & Hartford Railroad Company indicate that the company's claim against the Adams Express Company amounts to between \$2,000,000 and \$3,000,000. As the claim reaches back through many years, an interesting question has arisen as to how far it is barred by the statute of limitation. The whole question will probably again be considered at the meeting of the railroad company's board of directors the second Friday of next month, when the reply of the express company will probably be laid before them.

WRECK-PREVENTER
TO BE TRIED TODAY
BY ERIE RAILROAD

Electrical Signal Device In-
forms the Engineers of the
Condition of the Tracks
Ahead.

THIRD RAIL IS USED

NEW YORK—A device to prevent collisions of railroad trains will be tested today by the Erie Railroad on a specially prepared stretch of track 12 miles long between Newark and Paterson.

The device is electrical, and it keeps the engineer in telephonic communication with stations while the train is running at full speed, and should anything happen to the engineer, it stops the engine.

Ex-Borough President Jacob A. Cantor is the acting president of the company formed to exploit the new invention, the name of the corporation being the Electrical Automatic Railroad Safety Signal Company. Among those who are interested in the company, as given out by Mr. Cantor, are Cornelius Vanderbilt, Perry Belmont, Paul J. Rainey, Clarence H. Mackay, C. W. Bird and F. St. George. The device is the invention of a young man named Lacroix.

Engine 375, which has been especially equipped with the new device, will be used in today's tests. This test is the forerunner of a test which will soon be given for the benefit of the inter-state commerce commission.

Mr. Lacroix's system of preventing railroad collisions is based upon the closed-circuit principle. Its primary features are a dynamo current and circuit and a battery current and circuit in the locomotive cab, connected by a shoe on the locomotive through a small third rail parallel to the track, and then through line conductors and relays with the ordinary track circuit.

The circuit relays and resistances are so arranged that normally a low current of about 10 volts is maintained in the closed circuits of the cab and through the conductor circuits. Any break or defect in either will therefore give a danger signal.

In like manner, any short circuit caused by another train being within the section or the succeeding section gives a danger signal.

The danger signal consists of two gongs on independent circuits and sources of power, placed in the cab over the boiler, and a red light and recording indicator adjacent. When a track is short circuited by a train or an open switch, bridge down, or broken rail, the bell rings loudly, whistle blows and the red light flashes, and the recording instrument records not only the signal, but also states the time such signal was produced. This recording instrument consists of an electro-controlled pencil. It writes down each signal in red ink. This is a check on the engineer in the event of a dispute. In addition to these signals, a mechanism called an automatic stop is placed in the cab of the engine. In case the engine driver fails to hear the signals or in the event of his suddenly leaving the throttle, the device commences to work and brings the engine to a full stop.

BROCKTON "LOOP" MATTER IS HEARD

BROCKTON, Mass.—The petition of the Old Colony Street Railway Company for "loop" tracks through East Elm street, City Hall square and School street, was considered by the aldermen Tuesday evening.

President B. B. Winslow of the Commercial Club, President Horace A. Poole of the board of trade and other prominent citizens opposed the location. General Superintendent John T. Conway argued for it. The aldermen took the matter under advisement.

AN APPRECIATION

NEW YORK CITY, May 17, 1909.
Publisher: "Christian Science Monitor",
Boston, Mass.
Dear Sir:—
Since looking over May 8th issue of the "Christian Science Monitor" I have several times been on the point of extending my congratulations in the form of a letter and find I can no longer resist the desire to say a word or two relative to the wonderful growth in volume of business shown in the advertising department of your publication.
I have been an active worker in the newspaper advertising field for over thirty-five years and I can recall the name of no other publication which has in so short a time risen from a comparatively small beginning to such remarkable pre-eminence as a medium for the promotion of profitable publicity. Moreover, it is a great pleasure to note that the same wholesomeness and cleanliness which characterize the "Monitor's" editorials and news items, are reflected in the advertising columns.
Very respectfully,
C. A. Gleason

Burlington Proud of the Fact That the World's Fifth Steamboat, the Vermont, Was Built There

The Champlain Celebration Will Mark the Centennial of Steam Navigation on the Lake.

YACHTING INTEREST

BURLINGTON, Vt.—One particular historical fact of which this city will be proud during the celebration of the Champlain tercentenary week in July is that here the world's fifth steamboat was built and launched.

LAKE CHAMPLAIN YACHT CLUB HOUSE.

Will be the center of yachting activity during the tercentenary week.

anniversary of the discovery of the lake by Champlain, the celebration will mark the centennial of steam navigation on the lake.
The Clermont, Robert Fulton's famous steamboat, started from New York for Albany on Sept. 4, 1807, and made the trip in 32 hours. On board was John Winans, who saw at once the great possibilities of steam navigation. He had been interested from the first in every detail of Fulton's invention, and he resolved to build a steamboat of his own and to use it to revolutionize the trade between the states and Canada by way of Lake Champlain.
Burlington was then the center of this trade. Here was landed for distribu-

NEWEST LAKE CHAMPLAIN STEAMER.

Ticonderoga at dock at foot of street in Burlington, Vt., where the lake's first steamboat was launched.

The Vermont was larger than the Clermont, being 120 feet long, 20 feet wide and 8 feet deep. Its speed was four miles an hour. John Winans captained his own boat and his pilot was Hiram Ferris of Pantou, Vt., said to be a descendant of that Ferris who entertained Benjamin Franklin and the other commissioners on their way to Canada in the spring of 1776. The steamer ran until October, 1815, when it was sunk near Isle aux Noix.

The Phoenix, launched on the Delaware in 1807, and the Raritan and Car of Neptune, launched on the Raritan and Hudson rivers in 1808, were the boats that immediately followed the Clermont.

Today the railroads have taken much of the commerce from the lake, but a large amount of business is done by the boats of the transportation company, the newest of which is the Ticonderoga.
Numberless pleasure craft ply the lake, and a feature of the week's celebration will be the yachting events planned by the Lake Champlain Yacht Club, which has extended invitations to yachtsmen throughout New England, New York and eastern Canada. It is expected that the largest fleet of pleasure craft ever assembled on the lake will make its headquarters here during the week.
The United States has promised two torpedo boats, and it will be the first time such boats have been seen in the lake.

Mr. Winans lost no time in building his boat, for the first Vermont was launched in the spring of 1809 at the foot of King street, where are now situated the Champlain Transportation Company's docks.

SLIPS AWAY AFTER RESCUING A CHILD

New York Stevedore Refuses to Leave His Name With Policeman for Medal and Goes to Dry His Clothes.

NEW YORK—Somewhere in New York a big longshoreman has hung his clothes to dry. He jumped into the North river and saved the life of 12-year-old Jimmy Gallagher, who fell overboard while trying to catch a high fly. The longshoreman was too modest to tell his name to the police.

Jimmy was playing in the outfield at Twenty-seventh street and Thirteenth avenue when the ball was batted, and Jimmy backed over the stringpiece into the water. He couldn't swim. Still holding the ball in his hand, he went under. The tall longshoreman without waiting to doff his overalls went over after Jimmy. He came up without him, but one of Jimmy's companions who had seen where Jimmy went down directed the tall longshoreman. The next time the longshoreman came to the surface he had Jimmy in his left arm and was swimming for a nearby float.

Policeman W. J. Cassidy of the old West Twentieth street station got on the float and pulled Jimmy up. Then he helped the tall longshoreman.
"What is your name?" asked Cassidy of the longshoreman.
"Never mind that; I ain't lookin' for no medals," said the man. When Jimmy was started on his way Cassidy couldn't find the tall longshoreman.

CARNEGIE TO GIVE FRANCE HERO FUND

Million Dollar Endowment to Be Announced Today at Paris Luncheon in Honor of Philanthropist.

PARIS—Andrew Carnegie of New York has arranged to give \$1,000,000 for the establishment of a "hero fund" in this country.
It will be available under conditions similar to those which govern like funds in the United States, England and Scotland. Formal announcement of this gift will be made at a luncheon at the Sorbonne today, at which Mr. Carnegie will be the guest of honor. President Fallieres will attend the luncheon.

During his brief stay here Mr. Carnegie is being showered with attentions. Baron de Estournelles de Constant will give a dinner to him tonight. Mr. Carnegie will leave on Thursday for London.

CHAMPLAIN CONTRACT AWARD.

RUTLAND, Vt.—The New York state Champlain tercentenary commission has awarded Metzger Brothers of this city the contract to decorate Crown Point, Fort Henry and Plattsburg for the celebration in July, for \$5000.

TWO-CENT GAS FOR TULSA, OKLA.

An offer of the Henry Gas Company, whose gas field is 12 miles northeast of Tulsa, Okla., to furnish Tulsa with gas for industrial purposes at 2 cents per 1000 cubic feet at the wells, providing the city build a pipe line, has been accepted. This proposition holds good during the life of the wells, says the St. Louis Globe-Democrat. The city is prepared to build the pipe line, and it is said will furnish manufacturers gas as cheap as 3 cents.

STREET RAILWAY TO IMPROVE ROAD

LAWRENCE, Mass.—The Boston & North Street Railway Company is to spend \$120,000 on improving its tracks on Essex street and equipping the power house with additional facilities.

TOLSTOI PUBLISHER GUILTY.

ST. PETERSBURG—Nicolai Selden has been sentenced to six months in the fortress on the charge of having published Count Leo Tolstoy's "Thou Shalt Not Kill" and other political pamphlets.

TAFT ABOLISHES FINE ART COUNCIL

WASHINGTON—President Taft has abolished the council of fine arts created by President Roosevelt, which was to have charge of the beautification of Washington, to pass upon the design of government buildings, etc. This action was required by the last sundry civil bill, which failed to appropriate money for expenses or salaries of any of the commissions created by President Roosevelt without the consent of Congress.

SYSTEM OF SCHOOL VISITORS IS PRAISED AS AID TO CHILDREN
Boston and New York Specialists Address Providence Public Education Association on Work in Two Cities.

PARENTS ASSISTED
PROVIDENCE, R. I.—What is being done in Boston and New York by school visitors in adjusting the "difficult" child to the duties of the school and the home was presented by leading workers in those cities before the Providence Public Education Association at the annual meeting of the association at Manning Hall.

The details of the work were touched upon by Miss Mary S. Marot, who has charge of the home and school visitors connected with the public schools of New York city, and Mrs. Katherine Ware Smith, visitor for the Winthrop school district in Boston.

Mrs. Smith said that it was absolutely impossible to deal with the child without knowing the home conditions. The teacher often blamed the child for something that was resultant from its home life. Quiet, firm persistence seemed to win every time. Mrs. Smith said that the foreigner, such as the Italian or Syrian, did not seem to know how to control the child. The parent got angry instead of being firm and persistent. She detailed several cases in which the calm, quiet persistence of the visitor brought the child back to the school and also effected changes in the home life for the betterment of the child and advantage of the parents.

Miss Marot said that the loss of the human element in the pupils due to the school system had given rise to many attempts to remedy such loss. The kindergarten teachers, she said, had long known

The open meeting of the Clef Club was held in college hall and an original program of compositions by the girls was given.</p> <p>The Mathematical Club has elected: Vice-president, Leslie Leland '10; secretary, Mary Brewster '10; treasurer, Mildred MacDonald '10.</p> <p>The members of the faculty have been invited to meet Dr. Marion LeRoy Burton, the president-elect, on Thursday of this week.</p> <p>The Rev. George Gordon, D.D., of Boston, is to deliver the oration to the graduating class June 15.</p>	Radcliffe College The Ilder Club has elected these officers: President, Mary R. Walley, 1910; vice-president, Margaret Richardson, 1911; secretary, Elizabeth B. Lee, 1910; treasurer, Dorothy E. Brewer, 1912. <p>The Cambridge Latin School Club of Radcliffe has elected the following officers: President, Marion Woodworth; vice-president, Marion Blackall; treasurer, Alice Yeager; secretary, Charlotte Balmer.</p> <p>A reception was given Thursday afternoon by Miss Anna Wellington at her home, 420 Beacon street, Boston, to acquaint students and graduates of the college with the committee on distant work. Miss Wellington is a graduate of Radcliffe in 1906.</p> <p>About 100 persons were present, being mostly Radcliffe girls from a distance. Miss Nichols, chairman of the committee on distant work, explained its purpose. This was, she said, to create interest in Radcliffe in every state by the formation of clubs and the distribution of illustrated pamphlets.</p> <p>Her speech was followed by remarks of girls now in college who live at a distance. Miss Floretta Elmore of Wisconsin, Miss Elveth Reeves of North Dakota, and Miss Olive MacDonald of Alabama gave interesting accounts of the attitude toward Radcliffe in their states.</p>	Worcester Technology WORCESTER, Mass.—The junior mechanical engineering students of the school recently made a trip to Providence to visit the Gorham Silver Works. The party also visited the Brown & Sharp Manufacturing Company, makers of all kinds of tools and milling machinery. The auto factory of the American Locomotive Automobile Company was visited. <p>Regular recitation work for the year closed last Saturday and final examinations began Monday. These examinations continue throughout the present week and are followed by summer practice, which begins in the various departments of the institute on Tuesday, June 1, continuing for three weeks. Commencement falls this year on June 10.</p> <p>The sophomore class in shop work, from the course in civil engineering, completed their machine and forge work by a trip to the Grand street works of the Crompton & Knowles Company, builders of looms.</p>	Wellesley College Miss Adele Lathrop, instructor, is to take a small party abroad for travel this summer. Associate Professor Sherwood is to be absent next year, 1909-10, on leave. Associate Professor Shackford will be abroad for the first semester of this next college year and Associate Professor Jewett for the second semester.

GIRLS FORBIDDEN USE OF POWDER
NEW YORK—Powder puffs and beauty spots have been forbidden the girl students by Miss Rachel Bengamini, principal of the branch of the Washington Irving high school at West End avenue and Eighty-second street, under penalty of standing up before the class, while these supposed aids to good looks were removed with a towel.

There were no powder marks or beauty spots in sight today.

Miss Bengamini has added a new rule obliging the high school girls to go straight home and hold no conversation with the boys from the School of Commerce near by.

TEXAS SECURITIES BILL VETO?
AUSTIN, Tex.—The law which was passed at the recent session of the Legislature authorizing security companies to form an association in Texas for their mutual protection and benefit is held by the attorney-general to be in conflict with the anti-trust law. Governor Campbell will veto it on this ground.

Gentlemen:—

We have been figuring out the proposition of advertising, that is, the results from the different papers which we advertise in, and I can frankly say that we have felt better direct results from the Monitor than almost any other paper we ever advertised in.

We are very much pleased and we certainly expect to continue in the same lines with your paper.

Very truly yours,

The Wm. H. Richardson Co.

How Two Country Boys Went to College

Two brothers lived on a hilly little New Hampshire farm. The elder was Ezekiel, the younger Daniel. Their father wished them both to have an education but saw that he could not send them both to college. One day Ezekiel said, "Father, I am strong and large and well able to do the farm work. Daniel is younger and slighter and brighter than I am. It would be better for one of us to have a good education than for both to be half educated. Let us send Daniel to college while I stay and help you here."

So it was decided and Daniel went to a preparatory school and was soon admitted to Dartmouth College. To those at home no sacrifice seemed too great that would help him get an education. But Daniel was troubled about his brother. He knew that he had great abilities, that he did not like farm work, that

he too wished to study for a profession. So he finally said to him: "This is all wrong. The farm is mortgaged to give me my schooling and you are working to pay off the mortgage. I will teach school to help myself, or wait longer to graduate, but you must go to college, too."

In the end the father agreed. He saw that it would take all he possessed to give both boys their schooling, but he felt it was the best heritage he could bestow, after all. So the very year that Daniel was graduated from Dartmouth his brother Ezekiel, now a grown man, entered the college.

And the "American Book of Golden Deeds" says that if it had not been for his brother's self-sacrifice Daniel's history might have been very different, while Ezekiel Webster's golden deed makes him forever a sharer of Daniel Webster's fame.

Stevenson a Pioneer of Spelling Reform

One of the most polished and painstaking of English authors regarded correct spelling as a totally unnecessary accomplishment, says the Chicago News. In his introduction to R. L. Stevenson's letters, Sidney Colvin writes: "I have not held myself bound to reproduce all the author's minor eccentricities of spelling and the like. As all his friends are aware, to spell in a quite accurate and grown-up manner was a thing which this master of English letters was never able to learn."

Stevenson's influence upon present-day writers is perhaps more pronounced than that of any other of the master craftsmen who set a pace for aspiring genius. Possibly he also cast unconsciously his unscientific spell over the orthography of a rising generation, and when the Bacon-Shakespeare controversy again subsides we may find another cult sprung up to show that the beloved Robert Louis fathered the bulletins of the later day spelling board.

To Silence Envious Tongues

A review of the life of President Taft in the Photographic World includes this bit of evidence to show the quality of the man:

Lifelong friends say that they never heard him speak ill of a person behind his back, and never saw those kindly, smiling blue eyes condemn one who was not present to defend himself.

The Settlers of Germantown

In the summer of 1682 William Penn sought the spot, just above the confluence of the Schuylkill and Delaware rivers, and there laid out "the squarest and levellest city, no doubt, that our planet had ever seen."

About a year later there landed a number of Mennonites from the German Palatinate, who chose and had surveyed 5700 acres of land, close by the infant city of Philadelphia.

There they laid out streets and built stone and log dwellings, and thus established Germantown, the now extensive and beautiful suburb of the city of brotherly love. These German settlers, then commonly called Palatinates or German Quakers, were the descendants of the Medieval Quietists and had ideas much in common with the disciples of George Fox.

For generations they had suffered persecution, and when William Penn in his many visits to Germany had opened up to them visions of his "Holy Experiment" in the new world—a commonwealth where perfect freedom of religion and politics should prevail—they had seized the earliest opportunity to cast in their lot with the Quaker colonists.

The founders of Germantown were under the leadership of Francis Daniel Pastorius, a learned and enthusiastic scholar and were but the precursors of that steady stream of German sects which spreading through Pennsylvania, Maryland and the Carolinas, profoundly affected the

character of the inhabitants. Although the Palatinates in Germantown have long ceased to exist as a distinct sect, and the gable one-story houses have disappeared, yet there is no doubt that their zeal, learning and devotion to literature helped to mold the characteristics of the people of Philadelphia. Together with the English Quakers, the Germans early denounced slavery, and there is in existence the "Memorial of 1688," in which the "German Friends" protested against the buying and selling of slaves.

In Revolutionary times Germantown had practically become a suburb of the already important city of Philadelphia, and many of the influential and wealthy families had mansions there, where they could enjoy all the pleasures of country life, and yet be close to the city. Some of these dwellings still survive to demonstrate forcibly the comfort and refinement of the period, and their architecture and surroundings shame the vagaries of the home building of our day.

The Chew mansion, a fine example of the Colonial style, still stands in its beautiful and spacious grounds.

When Washington attacked Germantown, then occupied by the British army under the command of Lord Howe, the Chew mansion was the center of some vigorous fighting, and its walls were severely riddled by cannon and musketry shot.

THE CHEW HOUSE, GERMANTOWN, PA.
Mansion in the Colonial style, showing comfort and refinement of its period.

THE QUESTION OF TEMPO

The Word is Nearer to Temper Than to Time.

The question of tempo is one which needs to be brought up again and again, as even musicians seem not always to realize its full bearing on musical interpretation. W. J. Henderson, the New York critic, cites the story of a manager of an opera company who begged a critic to have a talk with his conductor. "I am told there is something the matter with his tempo, and perhaps you can find out just what it is," Mr. Henderson adds: "The innocent air of the manager, manifestly not knowing what manner of thing a 'tempo' might be, cannot be described in cold type."

Mr. Henderson in his further observations seems to rate the uses of the metronome mark in determining tempo rather high. This mark undoubtedly should have attention like any other, and Mr. Henderson indeed reminds us that it is not to be followed with the mechanical rigor of the marching quick-step where in 120 steps must be made in a minute, nor yet with the precision of many dances. But when he says that it is "the only means composers have to indicate their conception of the speed at which their music should be played" he seems to overlook the fact that what he calls the "speed" of the music is so essential an element that all the notes on the page really combine to indicate it. The mark may serve, however, in some cases to shorten study. If the metronome itself is actually to be applied to any piece of music it should be for not more than a measure or so at the very outset.

The very name "tempo" does not indicate time, nor what Mr. Henderson calls "speed," but something nearer to "temperament" or mood. The names of the various tempi—as "allegro," "vivace," "grave," "largo," etc.—often indicate the character of the music and sometimes, as "andante," its manner of going. Allegro music, joyful music, is like to have the rhythmic swing which we call fast, and grave or large themes the quality of deliberation (thoughtfulness) which we call slow.

After standing strongly in favor of metronome marks, and citing their increasing use by modern composers as an indication of their serviceableness, Mr. Henderson quotes Richard Wagner. But the Wagner quotation in itself seems hardly to uphold Mr. Henderson's view.

Wagner heard the Paris Conservatoire orchestra under Habeneck play a symphony of Beethoven and said of the performance:

"The French idea of playing an instrument well is to be able to sing well upon it. And that superb orchestra sang the symphony. The possibility of its being well sung implies that the true tempo had been found, and this is the second point which impressed me at the time. Habeneck was not the medium of any abstract æsthetic inspiration; he was devoid of genius. But he found the right tempo while persistently fixing the attention of his orchestra upon the melos of the symphony. The right comprehension of the melos is the sole guide to the right tempo. These two things are inseparable: the one implies and qualifies the other."

Here was an important admission on the part of the great German composer and conductor—that a Frenchman (for Habeneck was a native of France) had jawling. Your motto must be "Hoe age." Do instantly whatever is to be done and take the hours of recreation after business, never before it." Selected.

A Brave Sailor Lad

Thomas Campbell tells in rhyme the story of a British seaman captured by the French at the time of Napoleon. He was allowed to roam on the seashore opposite the English cliffs of Dover. The English channel is so narrow here that on clear days it is said one can catch sight of the Dover cliffs from the French coast. The boy laid aside such flotsam of the waves as might serve his use, and at last built a poor make-shift boat. He launched it, and without sail or rudder attempted the passage. He was seen and easily captured by the French. Their laughter at the vain enterprise finally reached Napoleon, so the story goes. The great captain wished to see the boy and asked him what had impelled such a rash venture, adding that some British sweetheart must have drawn him. The man simply answered that it was not a sweetheart, but a great longing to see his mother. Napoleon said that she must be a worthy mother of so brave a son, and ordered that the sailor be sent back to England under a flag of truce. He himself gave him a piece of gold, which the seaman always kept as the gift of Napoleon.

Good Advice

Sir Walter Scott, writing to a youth who had obtained a situation and asked for his advice, gave him in reply this sound counsel: "Beware of stumbling over a propensity which easily besets you from not having your time fully employed—I mean what the women call,

perament" or mood. The names of the various tempi—as "allegro," "vivace," "grave," "largo," etc.—often indicate the character of the music and sometimes, as "andante," its manner of going. Allegro music, joyful music, is like to have the rhythmic swing which we call fast, and grave or large themes the quality of deliberation (thoughtfulness) which we call slow.

After standing strongly in favor of metronome marks, and citing their increasing use by modern composers as an indication of their serviceableness, Mr. Henderson quotes Richard Wagner. But the Wagner quotation in itself seems hardly to uphold Mr. Henderson's view.

Wagner heard the Paris Conservatoire orchestra under Habeneck play a symphony of Beethoven and said of the performance:

"The French idea of playing an instrument well is to be able to sing well upon it. And that superb orchestra sang the symphony. The possibility of its being well sung implies that the true tempo had been found, and this is the second point which impressed me at the time. Habeneck was not the medium of any abstract æsthetic inspiration; he was devoid of genius. But he found the right tempo while persistently fixing the attention of his orchestra upon the melos of the symphony. The right comprehension of the melos is the sole guide to the right tempo. These two things are inseparable: the one implies and qualifies the other."

Here was an important admission on the part of the great German composer and conductor—that a Frenchman (for Habeneck was a native of France) had

caught the central secret of Beethoven's music—the real tempo. One questions the comment that he was devoid of genius, for if the right comprehension of the melos is the sole guide to the tempo, surely Habeneck's genius was no mean second to that of the composer. The word "melos" so used means more than our word melody. It is the Greek

word which lies back of "melodia," and is nearer song. It is the heart of the music, that singleness which we feel in some works and which is often lacking even where there is apparently melody or time. Wagner shows the "inwardness" of this word in saying that the right comprehension of the melos is the only guide to finding the tempo.

THE DAY OF SALVATION

Nearly 1900 years ago the apostle Paul made this emphatic declaration: "Behold now is the accepted time; behold now is the day of salvation." Nevertheless, humanity seems to be in doubt as to just how much a man may reasonably expect to be saved from today. Many people are of the opinion that salvation in its true sense belongs to the future and will not be experienced even then unless certain doctrines of faith are subscribed to in the present.

A man will not look to God for the blessing he believes it is not his privilege to enjoy. Thousands of honest and sincere men and women are trusting to material remedies, instead of to God, to heal them, simply because they have been led to believe that "the day of miracles is past," and that God does not now heal the sick as in the days of old. It is not because God cannot or will not restore them to health that they are not healed, but because they have accepted the erroneous belief which has robbed them of health and at the same time robbed the world of the great good they could accomplish if they enjoyed the health and strength that is rightfully theirs. The man who believes God can not, or will not, forgive his sins is suffering from a delusion and there is no reason why he should suffer as he does. He has a wrong sense of God. The true sense of God would convince him that

God is both able and willing to save him from sin. The mortal pays the penalty of his belief and so long as he acknowledges the belief he will be in bondage thereto even though unnumbered thousands of men and women who are as intelligent and experienced in all the affairs of life as he is, know from experience that his belief is void of intelligence and reality.

Who can tell to what extent humanity is in bondage to erroneous beliefs? Christian Science teaches that there are laws of divine Mind which, when understood and applied will result in physical healing just as certainly as obedience to God's requirements will result in moral healing. It is man's blessed privilege

to be made every whit whole. He only needs to be awakened to this fact and govern himself accordingly. "Now is the day of salvation" in its fullest and broadest sense. Now is the time to gain the victory over sin and disease. A little understanding of Christian Science will convince one of the truth of this statement and awaken him to the glorious possibilities of the present. If present opportunities are recognized and improved there is no occasion for anxiety about the future, for God's law is, and must forever continue to be, the law of life and harmony. "Now is come salvation, and strength, and the kingdom of our God, and the power of His Christ."

HOUSEWORK

Nothing which it is one's duty to do is tiresome or monotonous when one's attitude toward the work is right. The endeavor to be good should not be tedious. Being good is a matter of maintaining order and harmony in one's consciousness. Doing housework is a matter of maintaining order and harmony in one's home. The latter endeavor should be no more irksome than the former.

One who performs a duty without the desire to do it is not so likely to be rewarded by the work as one whose desire or motive is higher. Christ Jesus told his disciples that those who barely do their duty are "unprofitable servants" (Luke xvii, 5-10). Whether work shall be mean or noble to the one who does it depends more on where she places it in the moral scale of things than on its material features.

It is also true that a housekeeper should have an ideal of cleanliness, com-

fort and beauty and should try to express her ideal in the conditions of her household. In this way, her work will be interesting.

Moreover, when a woman is doing housework she is usually working for other persons than herself and she may therefore be aided in her work by unselfishness and love. These motives lighten work, strengthen the worker and increase the results of labor. One who is actuated by unselfish love will find joy in her work, even though she might otherwise have no desire to do it.

The Peace of Great Art

The greatest pictures represent men and women in peace, clouds and mountains in peace; men and women noble, clouds and mountains beautiful. Never in the universe does the great art of man acknowledge guilt, grief, change, or fear. —Ruskin.

"De L'l Brack Sheep"

I.
Poor l'il brack sheep, don't stray away,
Don't los' in de win' and de rain;
An' de Shepherd he say, "O hirelin',
Go, fin' my sheep again."
De hirelin' frown, "O Shepherd,
Dat sheep am brack an' bad."
But de Shepherd, he smile like de l'il brack sheep.
Wuz de onliest lamb he had.

II.
An' he say, "O hirelin', hasten,
For de win' an' de rain am col'.
An' dat l'il brack sheep am lonesome
Out dar so far from de fol'.
De hirelin' frown, "O Shepherd,
Dat sheep am ole and gray."
But de Shepherd, he smile like de l'il brack sheep
Wuz fair as de brack ob day!

III.
An' he say, "O hirelin', hasten;
Lo, here am de ninety-an'-nine;
But dar, 'way off from de sheep-fol'
Is dat l'il brack sheep ob mine."
An' de hirelin' frown, "O Shepherd,
De res' ob de sheep am here."
But de Shepherd, he smile like de l'il brack sheep
He hol' it de mostest dear.

IV.
An' de Shepherd go out in de darkness
Where de night was col' an' bleak,
An' dat l'il brack sheep he find it,
An' lay it agains' his cheek.
An' de hirelin' frown, "O Shepherd,
Don't bring dat sheep to me."
But de Shepherd, he smile and he hol' it close,
An' — dat l'il brack sheep — wuz me!
—Selected.

Aeroplaning the Coming Sport

Among the noted sportsmen who, according to recently published reports, have been taking an interest in aeroplanes, J. Pierpont Morgan is mentioned. The New York banker, art connoisseur and yachtsman is now abroad, and a cable interview represents him as saying that while he has not yet contracted for an aeroplane, he has great confidence in the Wright machine and may yet purchase one. Doubtless there are many other sportsmen on either side of the big water in pretty much the same attitude of mind. There is no reason for supposing that the cost of a Wright aeroplane, complete from gasoline tank to wings, will cost more than a high grade touring car. Probably the aeroplane can be furnished at a good profit to the builder, after paying the stipulated royalty to the inventor, for less than the cost of a touring car. In other words, aeroplanes should soon be within the reach of a good many; and it will be no occasion for surprise if, before the summer is past, the aeroplane race is listed among the sporting events. In France there is now an aeroplane manufacturing plant which has some form of contract with the Wright brothers for constructing aeroplanes after their model. Baltimore American.

True bravery is shown by performing without witness what one might be capable of doing before all the world. —La Rochefoucauld.

President Taft Checks Extravagance

FOLLOWING the assurance received from Secretary Meyer, in response to his chief's request for retrenchment, that at least \$10,000,000 may be saved in naval expenditures for the fiscal year of 1911, comes the news that President Taft has sent back to the war department the estimates submitted to him for the support of the military establishment, with an expression of his desire that they be reduced by approximately \$20,000,000 below the appropriations already made for next year. With this accomplished, the President will, as a matter of fact, have succeeded in cutting down the war department estimates by about \$36,000,000. As originally prepared, they were reduced by Acting Secretary of War Oliver, during Secretary Dickinson's visit to Panama, to a point, \$18,000,000 below the estimates for 1910, although \$16,000,000 above the appropriations for that year.

To meet the President's wishes will involve a still further reduction of \$18,000,000, and Secretary Dickinson is now engaged on the task of bringing his estimates down to the figures which the executive believes to be ample.

As usual, objection is at once raised. The despatches contain the passage: "Army officers say that reduction of the estimates, if persisted in by the President, means practically no construction for the army during 1911." The estimates referred to, it should be borne in mind, do not include either expenses on account of the Panama canal or the permanent annual appropriations.

If the policy followed thus far in the reduction of estimates be adhered to in the conduct of army expenditures it will very probably be found that there will be sufficient to provide for all the necessities of the establishment. The entire scale of operations must, however, be reduced to conform to the public demand for economy and to the President's desire to meet this demand. The tendency of late has been toward lavish expenditure in all departments, and it is a serious question whether results have justified it.

President Taft not only talks but means economy. He may not be able to make very striking reductions in any of the departments, and he may not be able to reduce the total expenses of the government to a sensational degree. Thirty millions saved in the navy and war departments is a small matter compared with a billion dollar appropriation; but the saving stands for more than it expresses in dollars.

It means that the tide of extravagance is being checked. This, perhaps, is as much as President Taft hopes to accomplish, and it is as much as the public, at present, can reasonably expect.

THE VOTE of Senator Dolliver against free lumber is regarded as "surprising" by the Washington correspondents, in view of the position he recently assumed with reference to other protective features of the tariff bill; but by many it is taken to show that so long as political considerations are permitted to influence the making of the national revenue law it will be next to impossible for members of the Senate or House, whether they be protectionists or free traders, conservatives or radicals in opinion, to be consistent in their attitude toward the schedules.

It is one of the anomalies of the situation that senators who have stood in their places and made eloquent and forcible speeches in behalf of the conservation of our forests voted on Monday against an amendment to the tariff bill which, if adopted, could not fail to assist materially in forest conservation. It is in the very nature of things that the tariff bill as at present constructed shall be a "give-and-take" measure, an arrangement under which one side grants a concession of which it cannot approve, that it may receive in return a concession which it knows to be wrong.

The vote on the free lumber amendment was a test of the consistency of not only those who have been proclaiming their desire to aid in the preservation of our natural resources but those who have been insisting that by "protection" they mean as much the protection of American labor as American manufactures. The importation of free Canadian lumber could not fail to promote conservation; it would cheapen building material, promote building and increase the demand for labor in the building trades.

The responsibility for the failure of the test should rest on the system which the American people have tolerated for years, rather than on the senators who are dominated by it and who in a majority of cases would be glad to see it overturned.

The Trans-Mississippi Congress at Denver

FROM a comparatively small beginning, the trans-Mississippi Congress, the twentieth annual session of which is to be held in Denver from August 16 to 21, inclusive, has grown to be a gathering of not only national but international consequence. This year's meeting gives promise of being the most important ever held. The congress will convene in Denver's immense auditorium; every arrangement is being made to insure the hospitable entertainment as well as the comfort of the delegates. It is hoped that President Taft may be able to attend. All of the railroads west of the Mississippi have made reduced rates for the occasion.

Some idea of the magnitude as well as the character of the coming session may be gathered from the announcement that the governors of nearly all the western states, as well as many from other parts of the country, the mayors of the principal cities, representatives of chambers of commerce, boards of trade, commercial associations in general, civic reform associations, and delegates from our insular possessions and from the Latin-American republics are expected to be present.

While there has been a dangerous tendency in the sessions of late years to wander away from the trans-Mississippi country and the matters of nearest moment to it, arrangements will be made this year to give it all the attention that its problems may require. It is thought that this may be done without seriously interfering with the program arranged for purely national and international matters. Special announcement, for instance, is made of the fact that evening

illustrated lectures will be a feature at the auditorium during the congress.

One of the many good results certain to follow this gathering will arise out of the fact that it will give the delegates from the South American republics a better insight into the affairs of their great neighbor than they could possibly obtain on an ordinary visit. Aside from the opportunity it will afford them of seeing the interior, it will throw them into contact with men who are in touch with large affairs and who are competent to enlighten them with regard to any point in which they may have interest or curiosity.

It is very certain, at all events, that the discussion in the auditorium at Denver next August will be comprehensive enough to cover practically every question of importance now before our people. It should prove a liberal education to those delegates from the colonies and from foreign countries who may be able to follow it.

AMONG other interesting statistical points brought out by Senator Money is one to the effect that the total wages affected by the tariff amount to \$2,277,848,537—which, to say the least, is a considerable payroll.

But the Boys Are Helping Themselves

SOME time since the chief of the electrical bureau of the city of Philadelphia recommended that wireless apparatus be installed "far up in the city hall tower," and that some of the higher schools, such as the technical and manual training institutions, be supplied with equipments of their own in order that instruction might be given their pupils in the practical application and operation of the new system of telegraphy. The proposition also included placing the Philadelphia police department in touch with the police departments of other cities, as well as with ships at sea. Although it was found that the cost of all this would be comparatively small, the matter was permitted to drag.

Now, Philadelphia discovers that the University of Ohio has, to all appearances, taken up this identical recommendation and is preparing to act on it. The department of engineering of that institution has ordered an equipment which will be capable of communicating with the new stations at Detroit, Cleveland and other points on the Great Lakes. The purpose is to turn out expert wireless operators.

It is greatly regretted in the Quaker City that it was not the first to inaugurate a system of instruction in wireless telegraphy, but since it permitted this opportunity to slip by, some urge that it proceed to act on the recommendation referred to without further delay. The height of the city hall tower is such that a station, invisible from the street, it is said, could be erected on such lines as to be among the most important in the United States.

This is a matter, however, which comes home to every city and town in the country, for it would be well nigh impossible now to name a community of considerable size in which many boys are not engaged in experiments, and in many cases successfully, with wireless telegraphy. As a rule, these boys are dependent for instruction on such books on the subject as have been published, and on newspaper articles, the latter especially.

Doubtless the time is coming when the educational institutions will recognize the necessity of imparting instruction of this character systematically and thoroughly. For the present, however, from Florida to northern Ontario and from Newfoundland to Alaska, not to go outside of this continent, boys are everywhere erecting their own stations on houses and barns, on chimneys and flagpoles, and are accomplishing results with their crude apparatus which are surprising the professionals and not infrequently confusing them.

It goes to show that the boy of this period will not be denied his opportunities, even if the schools are sometimes neglectful of theirs.

NICHOLAS II. is going to break the spell that has kept him at home for so many years. His plans for this summer include visits to Sweden, Denmark and Norway, to France and England, and even to Portugal, Spain and Italy. After all, it would not be so surprising to see him return home via Athens, Constantinople and Sofia. The imperial itinerary doubtless reflects Russia's international affiliations and the present trend of her "world-politics." But the Czar's cruise possesses more than political weight. It has a human interest.

Of late years the world's opinion of the young Emperor has undergone a considerable and pleasing change. It has become more just. Russia's struggle for constitutional freedom is more clearly understood and the Czar's character and part are better appreciated. The world, therefore, follows his growing freedom of movement with great and genuine interest. What lends a unique charm to the cruise is the fact that it will bring the Czar into personal contact with a number of young and very popular sovereigns. Their popularity is not confined to their subjects but is world-wide and is due to their democratic qualities and habits and their clean and pure living expressed in domestic felicity. Here is a revolution that is truly astounding when we look back two or three generations. Less fortunate, Czar Nicholas is equally worthy of respect; like King Victor or Don Alfonso, or the King of Norway, he cultivates a charming and a busy family circle.

While it might seem that the reviving vigor of the monarchical institutions should be ascribed to the higher qualities of the present sovereigns, it may be said with justice that those institutions have in late years grown in popularity and respect among large sections of the European population, and that this revival has strongly influenced the education and character-building of the royal scions. Throughout Europe there has been a perceptible revulsion against certain advanced tendencies of populism and the up-to-date monarchy is instinctively recognized to be a safer guarantee for the future than the republican form of government. It is, therefore, less of a revival than a real discovery, by the people, of the true nature and scope of the constitutional monarchy, which has resulted in the present unusually happy relationship between sovereign and subjects in nearly all European countries.

While the Czar may feel especially at home among his kin of Scandinavia and Britain, the prolongation of the cruise to Spain and Italy is calculated to have a singularly refreshing effect on him, not only for the wonderland of the Mediterranean coasts, but principally for the bracing optimism and buoyancy he will find in those young Latin sovereigns.

ANOTHER ambassadorship seems to be looking for an eligible.

The Defense of Panama

SECRETARY OF WAR DICKINSON and General Bell have laid down the lines on which the Panama canal shall be fortified. Pending the appropriation by Congress of the necessary funds, it is said, the plans must be considered as tentative. Yet not so tentative, after all, because the Panama canal is not to be thought of without fortifications flying the American flag. There is not a shadow of aggressiveness in this; merely the protection dictated by common sense. There are in reality two Panama canals. One is the link between the Atlantic and the Pacific, the gateway of the world's commerce from the East westward, from the West eastward, whose opening is an event prepared by the developments of centuries. The other is a passageway between the eastern and the western seaboard of the United States and Canada, Mexico, Central America and Colombia, and even between the Pacific and the Amazon territories of Peru and Ecuador. The one is a waterway of world-wide scope, whose neutrality, like that of the Suez canal, might be guaranteed by the powers; the other is a domestic American passageway, whose completion is as great an event in the economy of the American nations interested as the other is in the history of the world. As an American highway it must be adequately protected. It is evident, then, that, having undertaken to construct the canal, the United States must provide for its defense by sea and land.

From these premises it is clear why the fortifications planned during Secretary Dickinson's recent visit to the canal show a preponderantly powerful defense on the Pacific; the entrance to the Caribbean is easily defended by Great Britain's numerous West Indian islands. Great Britain appears as the natural ally of the United States through the identity of Canadian and American interests in the Panama canal. Nevertheless, the Caribbean side will also be protected by powerful batteries, and a military post is planned for the heights at Culebra, about midway between Colon and Panama.

The cannons of Flamenco and Ancon will never close the Panama canal to the world's ships; their purpose is to keep it open for all. And this purpose will make their presence alone suffice for all emergencies.

The Call of the Country

AT THIS time of year dwellers in the city look longingly toward the country, and the desire to possess a country home finds lodgment with many. To choose a suburban home, or, better still, a home in the midst of fields and woods far from the crowded streets and the noise and clamor of urban life, many are drawn to the country at this season and shown how right and natural it is that people should turn to the country and its beautiful surroundings for a home site. The sweetness and cleanliness of growing vegetation, the song of birds and the sunshine and fresh air all tend to make life there more enjoyable and happy. When nature lays aside her winter garb and reveals the verdant beauty of spring she is well nigh irresistible, and happy are those who can afford to avail themselves of the chance to get away from the city and enjoy the space and freedom which the country offers.

Many things have contributed in late years to add to the comforts of the country home. The automobile and trolley, the telephone and the comfortably built houses, with running water as well as numerous other improvements, have all helped to eliminate the inconveniences which once made existence away from centers of population anything but an unmixed joy and pleasure.

It is curious to note the reaction in recent years among business men and others of means away from city life. It is an illustration of how naturally the human family adjusts itself to changed conditions. They are indeed the leaders in a movement to stem the flow of population to the overcrowded cities, which has become so great as to make labor in the rural districts a problem of considerable importance. Today the "back to the soil" movement has set in so strongly that at the present rate it may take but a few years longer to bring the urban population back to the percentage of the whole which it occupied years ago. Meanwhile the lure of the country sends suburban real estate values rising rapidly and owners of tracts in proximity to the cities are reaping a harvest in consequence.

It is doubtful whether in all the country there is a more notable achievement in the domain of charity than the institution known as Girard College. Much has been said and written concerning the noble use to which Stephen Girard, the foremost of our early millionaires, turned his great fortune. A man of strong peculiarities, quiet and unobtrusive in manner, misunderstood by many and yet purposeful at all times, Girard conceived the idea that his fortune could be made most fruitful in training orphan boys to become useful and self-sustaining men. In his day education was perfunctory and superficial. It had not even reached the experimental stage from which emanated those greater ideas of practical education which have proved so helpful and so broad in later years. Individualism as an educational force was still unheard of. At best, the problem of education was treated generally; in results, it was purely a question of the survival of the fittest. No doubt many of the more advanced ideas of education today can trace their origin to the standard which Girard set up in emphasizing the training of the hands as well as of the head. Those orphan boys who have been fortunate enough to come under the jurisdiction and care of Girard College have much to be thankful for. They are provided for in every way from the time they enter the institution as small boys to the hour of their graduation as young men.

The wisdom of Stephen Girard's plan has shown itself in thousands of cases where graduates of the college founded by him have not only won places of great responsibility in commerce and industry but have distanced many of their fellows who have been taught in schools where less attention is given to the essentials and more to mere forms.

In Philadelphia, last week, on the one hundred and fifty-ninth anniversary of Girard's birth, there was observed in Girard College what is known as "Founder's Day." It is worth noting that from the thousands who have graduated from this wonderful institution there were present many hundreds of men coming from all sections of the country to enjoy the celebration with the 150 who are at present enrolled as pupils of the institution.

STRANGE to say, St. Paul and Minneapolis are not disputing as to which was first discovered by the Norsemen.

The Founding of Girard College
